

Double Number Line Diagram

We can use a **double number line diagram** to find many equivalent ratios.

Example:

A recipe for fizzy juice says, "Mix 5 cups of cranberry juice with 2 cups of soda water." The ratio of cranberry juice to soda water is **5:2**. Multiplying both ingredients by the same number creates equivalent ratios.

This double number line shows that the ratio **20:8** is equivalent to **5:2**. If you mix 20 cups of cranberry juice with 8 cups of soda water, it makes 4 times as much fizzy juice that tastes the same as the original recipe.
