It's anything but difficult to get discouraged for anybody beginning with philosophy. Unlimited language, wordy sentences and clutter of discrete thoughts regularly darken valuable experiences into being human and how we should live our lives – like attempting to respect a lovely sea through a filthy window.

However, these flickers offer you a sure and straightforward way through that bog, taking Western idea's most mind-boggling and crucial thoughts and refining them into language that everybody can get it. Beginning with old Greek originations of the universe and completing with the ascent of contemporary humanism, you will find out pretty much all the significant stages in Western philosophy's advancement.

More than that, these flickers will demonstrate to you how unique philosophical schools have applied their shrewdness solidly, empowering followers to defeat their dread of death and live more joyful, increasingly substance and progressively significant lives.

1 – Philosophy has three essential dimensions.

To plot the historical backdrop of philosophy, we should comprehend what it is – how it functions, and what it looks to accomplish.

Anyway, what is philosophy?

Shockingly, there's no generally acknowledged definition – scholars are a famously stubborn and factious gathering. Be that as it may, we can land at an agreeable depiction with a touch of thought.

In the first place, people are, in philosophical language, limited creatures: mortal animals possessing a restricted fix of existence. Also, in contrast to different creatures, we're mindful of these breaking points. A pooch or lion, for example, has no development information about their death. They're just worried about the present minute. Yet, people live realizing that they – and their friends and family – will pass away.
