Recommended Practice for validating the function and integrity of an automatic transmission park mechanism with its
associated control system and environment This document has been updated for improved clarification and also to reflect
new reference standards **Automatic Transmissions - Manual Control Sequence** Automatic Transmission and
Transaxle Committee,2017 The scope and purpose of this SAE Recommended Practice is to provide a standard pattern or
sequence for the manual control of automatic transmissions in passenger cars and light duty trucks This generally refers to
left hand drive mechanical shift applications This document is published as Stabilize The J915 content is not fully compliant
with current industry developments and as such may require a different standard The content within the J915 standard relies
on Federal Motor Vehicle Safety Standards FMVSS 102 and 114 Portions of the J915 standard that are unique may not
represent current common practices within the user community When this standard was initially published it reflected a
common philosophy towards automatic transmission manual controls sequence Since that time changing technologies like
self driving cars satellite controlled driven cars and electric cars may have led members of the user community to have
potentially divergent methods for manual controls sequences of automatic transmissions beyond the minimum requirements
specified within the applicable Federal Motor Vehicle Safety Standards As a result a different standard may be required
