[Quicklet on Daniel H. Pink's Drive: The Surprising Truth About What Motivates Us](#) Paula Braun,2012-02-16 ABOUT THE BOOK In Drive Daniel Pink makes the case that it's time to rethink our business practices The contemporary view of motivation is that if you want people to perform better you give them contingent rewards or threaten them with punishments For many twenty first century tasks however contingent rewards such as monetary incentives do not work Incentives narrow focus and restrict possibility so they're only effective for tasks that have clear set of rules and obvious solutions Too many organizations make decisions based on management assumptions that are outdated and often do more harm than good The old way of thinking about motivation led

to the collapse of the financial system in 2008 and had repercussions throughout the global economy The stakes are too high to keep operating under a flawed business as usual mentality MEET THE AUTHOR Paula Braun is a recovering bureaucrat On a whim she took a one year assignment in Iraq and followed it with another one year assignment in Afghanistan After that she needed a break so she semi retired and joined a bridge club To support her bridge habit she entered the glamorous world of freelance writing You can follow Paula on twitter paula_braun friend her on Facebook or read her lenses on Squidoo <http://www.squidoo.com/lensmasters/PaulaSquidoo> EXCERPT FROM THE BOOK The conventional view of human motivation is not only outdated it s ill prepared to handle how we organize what we do how we think about what we do and how we do what we do People are not robots programmed to maximize profits We all have internal motivators and seek self direction Continuing to operate out of the old conventional view hampers our economic progress Rewards and punishments often lead to the opposite of their intended aims They give us less of what we want by extinguishing intrinsic motivation diminishing performance crushing creativity and crowding out good behavior They also give us more of what we don t want by encouraging cheating shortcuts and unethical behavior becoming addictive and fostering short term thinking There are times when incentives and other if then type external rewards work but they often backfire because by design they limit our focus and foster short term thinking In general the less people feel controlled the better they will perform in the long run
