

# Dynamic Analysis of Structures

John T. Katsikadelis

Systematic and accessible, *Dynamic Analysis of Structures* reflects the latest application of structural dynamics theory to produce more optimal and economical structural designs. Written by an author with more than 37 years of researching, teaching, and writing experience, this reference introduces complex structural dynamics concepts in a user-friendly manner. The author includes carefully worked-out examples that are solved utilizing more recent numerical methods. These examples point the way to more accurately numerically simulate the behavior of various types of structures.

The essential topics covered in *Dynamic Analysis of Structures* begin with the basic concepts and principles of structural dynamics as they are applied to particles as well as rigid and deformable bodies, enabling the formulation of equations for the motion of any structure, no matter how complex. The author touches on the approximation of real structures using computational methods such as FEM. Rigid bodies in flexural structures as well as the base isolation of buildings are also covered and explained. Effective contemporary numerical methods for dynamic analysis are discussed. Numerical solutions for eigenvalue problems and the direct solution of equations for the motion of large systems are also discussed. In addition, the author has included a comprehensive appendix that serves as a reminder of rigid body dynamics. Simple computer codes are provided in FORTRAN<sup>®</sup> and MATLAB<sup>®</sup>.

- Covers the tools and techniques needed to build realistic modeling of actual structures under dynamic loads
- Provides the methods to formulate the equations of motion of any structure, no matter how complex it is, once the dynamic model has been adopted
- Provides carefully worked-out examples that are solved using recent numerical methods
- It includes simple computer algorithms for the numerical solution of the equations of motion, whose respective codes in FORTRAN and MATLAB are available on the online companion site
