*Computational Intelligence, Cyber Security and Computational Models* G. Sai Sundara Krishnan, R. Anitha, R. S. Lekshmi, M. Senthil Kumar, Anthony Bonato, Manuel Graña, 2013-11-26 This book contains cutting edge research material presented by researchers engineers developers and practitioners from academia and industry at the International Conference on Computational Intelligence Cyber Security and Computational Models ICC3 organized by PSG College of Technology Coimbatore India during December 19 21 2013 The materials in the book include theory and applications to provide design analysis and modeling of the key areas The book will be useful material for students researchers professionals as well academicians in understanding current research trends and findings and future scope of research in computational intelligence cyber security and computational models

Research Anthology on Bioinformatics, Genomics, and Computational Biology Management Association, Information Resources, 2024-03-19 In the evolving environment of bioinformatics genomics and computational biology academic scholars are facing a challenging challenge keeping informed about the latest research trends and findings With unprecedented advancements in sequencing technologies computational algorithms and machine learning these fields have become indispensable tools for drug discovery disease research genome sequencing and more As scholars strive to decode the language of DNA predict protein structures and navigate the complexities of biological data analysis the need for a comprehensive and up to date resource becomes paramount The Research Anthology on Bioinformatics Genomics and Computational Biology is a collection of a carefully curated selection of chapters that serves as the solution to the pressing challenge of keeping pace with the dynamic advancements in these critical disciplines This anthology is designed to address the informational gap by providing scholars with a consolidated and authoritative source that sheds light on critical issues innovative theories and transformative developments in the field It acts as a single reference point offering insights into conceptual methodological technical and managerial issues while also providing a glimpse into emerging trends and future opportunities

**Machine Learning in Cancer Research With Applications in Colon Cancer and Big Data Analysis** Lu, Zhongyu, Xu, Qiang, Al-Rajab, Murad, Chiazor, Lamogha, 2021-05-28 Cancer continues to be a growing problem as it is the foremost cause of death worldwide killing millions of people each year The number of people battling cancer continues to increase owing to different reasons such as lifestyle choices Clinically determining the cause of cancer is very challenging and often inaccurate Incorporating efficient and accurate algorithms to detect cancer cases is becoming increasingly beneficial for scientists in computer science and healthcare as well as a long term benefit for doctors patients clinic practitioners and more Specifically an automation of computation in machine learning could be a solution in the next generation of big data science technology Machine Learning in Cancer Research With Applications in Colon Cancer and Big Data Analysis presents algorithms that have been developed to evaluate big data approaches and cancer research The chapters include artificial intelligence and machine learning

approaches as well as case studies to solve the predictive issues in colon cancer research This book includes concepts and techniques used to run tasks in an automated manner with the intent to improve better accuracy in comparison with previous studies and methods This book also covers the processes of research design development and outcome analytics in this field Doctors IT consultants IT specialists medical software professionals data scientists researchers computer scientists healthcare practitioners academicians and students can benefit from this critical resource

**Enhancement to Selective Incremental Approach for Transductive Nearest Neighbour Classification** E. Madhusudhana Reddy, 2012-12-28 Master's Thesis from the year 2012 in the subject Didactics Computer

Science course COMPUTER SCIENCE ENGINEERING language English abstract During the last years semi supervised learning has emerged as an exciting new direction in machine learning research It is closely related to profound issues of how to do inference from data as witnessed by its overlap with transductive inference Semi Supervised learning is the half way between Supervised and Unsupervised Learning In this majority of the patterns are unlabelled they are present in Test set and knowed labeled patterns are present in Training set Using these training set we assign the labels for test set Here our Proposed method is using Nearest Neighbour Classifier for Semi Supervised learning we can label the unlabelled patterns using the labeled patterns and then compare these method with the traditionally Existing methods as graph mincut spectral graph partisan ID3 Nearest Neighbour Classifier and we are going to prove our Proposed method is more scalable than the Existing methods and reduce time complexity of SITNNC Selective Incremental Approach for Transductive Nearest Neighbour Classifier using Leaders Algorithm
