Sapaty,2024-06-29 The current book chooses graphs and networks as primary and global research objectives after reviewing different types and areas of networking and existing works on graph and network operations The ideas of this book originate from the WAVE approach which allowed us more than half a century ago to implement citywide heterogeneous computer networks and solve distributed problems on them in flexible and mobile way The invented management paradigm evolved into Spatial Grasp Technology resulted in European patent and nine previous books oriented on concrete applications in social and defense systems security crises management collective robotics space research and others Many obtained results were dealing with graph and network structures and problems which were extremely important in the researched areas It aims at development of higher level social infrastructures effectively integrating different types of networking under the same universal approach also application of networking in new areas like organoids and brain research This book is oriented toward system scientists application programmers industry managers university students philosophers psychologists and United Nations personnel too   A Pattern Language for Sacred Secular Places Melanie Rachel Joseph,2006 Pattern Language is a term popularized by Christopher Alexander and his co authors of the book A Pattern Language Towns Buildings Construction Sara Ishikawa and Murray Silverstein in the late 1970 s Though intended to enable every citizen to design and construct their own home pattern language never quite caught up with those in the field of architecture mostly because of its lack of flexibility The core idea of Alexander s pattern language was to arm architects designers and the common people with a tool that would empower them to make informed decisions related to designing places that would comply with their needs and wants What architecture needs the most today is the ability to heal and invigorate I believe that contemporary architecture lacks such places that enable occupants to connect and communicate with what is within and what is without A number of studies have proven that universally sacred a majority of which are religious in function places are charged with energies that could contribute towards this process The energies also referred to as patterns are the energies unique to a place that make it special and sacred not just in the religious context but also in the secular context This thesis is an attempt to derive a new pattern language for the creation of sacred secular places like our homes and work places which draw from the pattern lists that have been proposed in four separate instances by authors including Christopher Alexander and Phillip Tabb This new pattern list is aimed at providing architects and designers with a tool for creating secular places with an element of sacrality without having to taking on a religious meaning   **Building Change of Use** Dorothy A. obscure prose Distinguished sociologist Howard S Becker true to his calling looks for an explanation for this bizarre behavior not in the psyches of his colleagues but in the structure of his profession In this highly personal and inspirational volume he considers academic writing as a social activity Both the means and the reasons for writing a thesis or article or book are socially structured by the organization of graduate study the requirements for publication and the conditions for promotion and the pressures arising from these situations create the writing style so often lampooned and lamented Drawing on his thirty five years experience as a researcher writer and teacher Becker exposes the foibles of the academic profession to the light of sociological analysis and gentle humor He also offers eminently useful suggestions for ways to make social scientists better and more productive writers Among the topics discussed are how to overcome the paralyzing fears of chaos and ridicule that lead to writer s block how to rewrite and revise again and again how to adopt a persona compatible with lucid prose how to deal with that academic bugaboo the literature There is also a chapter by Pamela Richards on the personal and professional risks involved in scholarly writing In recounting his own trials and errors Becker offers his readers not a model to be slavishly imitated but an example to inspire Throughout his focus is on the elusive work habits that contribute to good writing not the more easily learned rules of grammar and punctuation Although his examples are drawn from sociological literature his conclusions apply to all fields of social science and indeed to all areas of scholarly endeavor The message is clear you don t have to write like a social scientist to be one **Proceedings of the 6th European Conference on Pattern Languages of Programs, 2001** Andreas Rüping,2002 Pattern Languages of Program Design James O.
