Enzymology and Molecular Biology of Carbonyl Metabolism 6 Henry Weiner,Ronald Lindahl,David W. Crabb,T. Geoffrey Flynn,2012-12-06 Since 1982 our ever expanding group of investigators has been meeting in exotic parts of the world to discuss aspects of three enzyme systems The 1996 meeting was no exception Nearly 90 scientists from 15 countries met in the small city of Deadwood South Dakota for four days of stimulating talks and

posters and incredible scenery Once more this meeting reflected the changing trends in biochemical research At the 1982 meeting most of the speakers discussed isolating new enzymes and trying to characterize them At this meeting many speakers discussed interpretations of three dimensional structure or regulatory elements of the genes controlling for the tissue specific expression of the enzyme Hopefully readers will find the proceedings of the meeting to be of interest Though they reflect the scientific information that was presented at the meeting they do not indicate the level of personal interactions that went on during the meeting Once again the willingness of the participants to discuss unpublished data and to share thoughts about the future directions of their research helped make this like our previous seven meetings a special scientific experience for those who attended
