Bandelj, Frederick F. Wherry, Viviana A. Zelizer, 2020-06-09. The world of money is being transformed as households and organizations face changing economies and new currencies and payment systems like Bitcoin and Apple Pay gain ground. This collection brings together a stellar group of international experts from multiple disciplines: sociology, economics, history, law, anthropology, political science, and philosophy, to propose fresh explanations for money's origins, uses, effects, and future. *Money Talks* explores five key questions: How do social relationships, emotions, and morals shape how people account for and use their money? How do corporations infuse social meaning into their financing and investment practices? What are the historical, political, and social foundations of currencies? When does money become contested, and are there things money shouldn't buy? What is the impact of the new twenty-first century currencies on our social relations? At a time of growing
