accompanied each large scale conflict during the twentieth century has been one of the most important factors in driving the
spectacular scientific advances made during the last hundred years The half way point of the century saw the horrors of the
first truly global battle World War II At that time the piston aero engine was at its zenith and the world s airforces were
almost entirely propeller driven It is a period that provides the most interesting study of these engines and the aircraft they
powered because the rapid change to turbojets that occurred in the post war era saw the demise of the piston engine on
almost all types of military aircraft and large airliners This book looks at the design and development of the most famous

many famous aircraft are illustrated to demonstrate installation and differing usage One Merlin makes a Spitfire two a
