Working Great! Richard Brimeyer, 2018-09-03 Significant sustained Lean success depends almost solely on leaders and the culture they foster No doubt some area specific and short term gains can be realized via a top down tools based approach But broad ongoing and organic improvement that is embraced by almost all employees requires a unique environment one carefully defined and nurtured by leaders Unfortunately many leaders and managers embark on their Lean initiative with a focus on tools either observed during a benchmarking tour disclosed during a short symposium presentation or peddled by their chosen Lean partner They are ill equipped to understand the critical behavior and attitude changes that will be required of them and their staff to sustain tools based improvements and more importantly to effectively promote and harvest employees innovation to remove waste Working Great provides an overview of a successful Lean journey Just as a would be traveler consults a travel brochure and websites prior to reserving a seat on a given vacation tour this book provides potential Lean leaders with an overview prior to embarking on a Lean initiative And unlike purely promotional materials Working Great provides an honest culture first assessment of Lean with an emphasis on the leaders responsibilities for a successful mission and the information required to determine if they and their organization are up for the journey Working Great gives readers A clear understanding of the relative importance and relationship between culture and tools for lasting Lean success Advice on various key strategic decisions such as choosing an external consultant and an internal coordinator Lessons to help take the mystery out of culture A heavy emphasis on specific critical leadership behaviors which support the desired culture Suggestions for selecting new employees and more importantly supervisors that will thrive in a Lean environment Recommendations for effectively rounding on employees a vital habit for Lean leaders An appreciation for the importance of and tools to aid in prioritizing and managing personal time as leaders shift their focus to building a Lean organization including the significance of time off Information on how various Lean tools support a Lean culture and are not a destination in themselves Case studies to describe realistic aspirations and to provide inspiration and encouragement during inevitable setbacks

The Complete Business Leader Christopher A. LeGrand,2019-08-14 Organizations of any size and focus will have bigger impact and be more successful by any measure when their leaders are well rounded and grounded can integrate across disciplines and can inspire diverse followers to produce results Organizations need Complete Business Leaders those who have mastered dimensions needed to be successful in work and life Developed by global business executive Chris LeGrand The Complete Business Leader lays out a framework with seven essential dimensions needed to deliver results This framework was developed and honed from Chris s

own leadership journey together with his passion for combining business acumen and positive social impact Chris's authenticity, commitment to making a difference, his successes and failures, and his drive for continued growth and leadership development come out in the real world stories he uses to convey the characteristics of each of the seven dimensions throughout the book. Chris's colleague Liz Mallas writes a chapter demonstrating how the framework came to life and was tested in a company setting. There is value in the Complete Business Leader framework whether you are a twenty-three-year-old starting a career, a mid-career mid-level leader, an entrepreneur, or a senior executive in a large business. And the framework has value regardless of whether your organization is a large or small business, a nonprofit, or even a church.

Leadership Transitions Richard Elsner, Bridget Farrands, 2012-09-03 In a working life of 35 years, a manager can expect to make at least 10 job changes or transitions where the demands for rapid business delivery and effective leadership will only increase with each new job. According to recent research, over 25 per cent of new leaders appointed from within fail within 18 months; the figure is closer to 40 per cent for new leaders appointed externally. The cost of this rate of failure is high, ranging from financial to performance to organizational disruption. This book identifies the sources of these failures and how to overcome them. The authors show that whether the new leader has arrived as an external appointment or has been promoted internally, the experiences can be divided into three phases: Arriving, Surviving, and Thriving. By analysing the different features of the leader's experience at each of these stages, the authors are able to provide a strategy for leaders to take charge and succeed in their new roles.

Business Leadership in Turbulent Times Michael Lawrie, George Tsetsekos, 2021-09-22 Business Leadership in Turbulent Times presents an integrative methodology for decision making that advances the notion that business success involves more than strategy. Strategy is an important facet but not the only determinant for success. Devising the strategy in the first place, deploying assets following a financial model that supports the strategy, picking the right leaders, and company culture all play critical roles. In this book, the authors share an approach for businesses to thrive during good and bad times. Reflecting on their diverse experiences in business and academia, they answer questions such as: Why do some firms become winners while others lose? How do successful firms create and sustain value? Why do firms that were once great suddenly fail? Most importantly, the authors provide a framework for senior executives to make decisions even during times of crisis. The book includes an appendix of insights and predictions about the impact of COVID-19 on business leadership. The crisis has implications on short and long-term priorities, the pace of innovation, and the role of leaders.
