Cane Toads Mark Lewis, 1988 **Cane Toads** Mark Lewis, 2001 **Cane Toads** Stephanie Lewis, 1989 The story of the introduction of Cane toads in Queensland sugar cane growing areas to catch the beetle pests The introduced toads subsequently spread across the land and became a pest themselves **Cane Toads** Martha London, 2021-08-01 This title explores the role of cane toads in introduced environments how humans helped spread the species the threats they pose to ecosystems and efforts being taken to manage them [The Cane Toad](#) Christopher Lever, 2001 **Watch Out for Cane Toads**, 2005 [Cane Toad Wars](#) Richard Shine, 2018-03-20 For 80 years giant American amphibians have been spreading through tropical Australia resulting in the death of millions of native animals Rick Shine and his research team set out to understand that invasion and its impacts and to develop new ways of protecting endangered wildlife from the tide of toads In the process Shine's work revealed that biological invasions can stimulate rapid evolutionary change and that understanding your enemy is the essential first step in combatting its deadly effects Provided by publisher **Cane Toads and Other**

Rogue Species Participant, Karl Weber, 2010-07-06 What does an unusually large ugly invasive species of toad have to do with global warming international trade and the survival of biodiversity Quite a lot actually Mark Lewis s amazing and hilarious documentary Cane Toads tells the story of Bufo marinus which was introduced to Australia in 1935 to control bugs but which quickly became a far greater menace than the beetles they eat Today they number in the hundreds of millions and are taking over Australian habitats at 25 miles per year spreading disease and killing native species as they go Rogue Species explains the little understood dangers of invasive species Ranging from the zebra mussel currently threatening the health of the Great Lakes to the infamous kudzu vine a Japanese import that now smothers seven million acres in the American southeast these disastrous human blunders threaten the biodiversity on which all life including our own depends The book will raise readers awareness about the threat of non native species increase their appreciation of natural biodiversity and explain what they can do to help protect unique ecosystems wherever they live or travel *Cane Toads: The Conquest*, 2015

The South American cane toad s unstoppable journey across the Australian continent has long been the focus of great controversy and bizarre fascination The cane toad was introduced to Australia in 1935 in an attempt to control the greyback cane beetle Unfortunately the toads were disinclined eat the beetles Instead they set about doing what cane toads do best multiplying migrating and thriving 75 years later in a country equipped with unprecedented scientific capabilities and unabated public will to battle the invasion it seems nothing will stop the march of the Toad Science and genetic mutation have failed so too has physical aggression Fences and traps have proved ineffectual as have natural predators and topographic barriers No other species has occupied a nation s consciousness like the toad which has achieved both criminal and cult status Throughout history it has proven itself to be the ultimate survivor in the face of great adversity It spreads it grows it devours Cane Toads The Conquest explores the history the science the human conflict and the bizarre culture surrounding this notorious environmental blunder Director Mark Lewis injects his trademark irreverence and humor into a story filled with engaging characters and incredible first hand accounts This is a truly poignant environmental cautionary tale on the issue of invasive species and human folly As the world wrestles with the idea that we have irretrievably altered our own ecosystem these bulbous creatures may be the ultimate metaphor for the inevitable path upon which we have set ourselves
