Resolving the Late Paleozoic Ice Age in Time and Space Christopher R. Fielding, Tracy D. Frank, John L. Isbell, 2008-01-01 This volume summarizes new developments in understanding the longest lived icehouse period in Phanerozoic Earth history the late Paleozoic ice age Resolving the Late Paleozoic Ice Age in Time and Space provides summaries of existing and new data from the various Gondwanan continental relics and also reviews stratigraphic successions from the paleotropical and temperate regions of Laurussia that preserve an indirect record of glaciation It addresses the extent to which records of glaciation indicate protracted long term climatic austerity as opposed to fluctuating more dynamic climate and provides new constraints on the timing of glaciation Additionally it tackles questions of synchronicity of glaciation across the various Gondwanan continental relics and timing relationships between near field and far field records at greater levels of resolution than has been possible previously Results point toward a dynamic icehouse regime that is comparable to the Cenozoic icehouse and away from traditional interpretations of the late Paleozoic ice age as a single protracted event that involved stable long lived ice centers Publisher s website **Year Book Australia** , *The Impacts of Igneous Systems on Sedimentary Basins and their Energy Resource* B. Kilhams, S. Holford, D. Gardiner, S. Gozzard, L. Layfield, C. McLean, S. Thackrey, D. Watson, 2024-08-13 Many sedimentary basins worldwide contain extrusive and intrusive igneous rock sequences and these rocks and associated magmatic processes can exert profound influences on a diverse range of basin processes and elements including multiscale structural and tectonic development heat flow transport of hydrocarbons and other basinal fluids and the hydraulic properties and integrity of reservoir and sealing units Recent years have witnessed increased focus on improved understanding of igneous processes in basins to aid hydrocarbon exploration and development projects and there is growing interest in the multifaceted role that igneous sequences in basins may play in the energy transition for example as components of carbon capture and storage projects and sources of geothermal energy natural hydrogen and helium This volume showcases state of the art research from both academia and industry drawing on global examples and addressing reservoir to plate scales providing critical new data knowledge and technological capabilities that highlight the opportunities complexities and potential pitfalls associated with unlocking the energy resources of sedimentary basins impacted by igneous processes *Securing Australia's Future* Simon Torok, Paul Holper, 2017-05-29 The future will bring change for Australia But whether that change is for the better or worse largely depends on the decisions we make today as individuals and as a nation Recognising rapid changes in the global economy environment and policy the Australian Government engaged the Australian Council of Learned Academies ACOLA to undertake detailed interdisciplinary research to help guide Australian thinking and policy decisions Dozens of Australia s

finest minds assessed the opportunities available to the nation globally and domestically charting a course for the future The resulting findings can prepare Australia to address the challenges ahead and make the most of the opportunities Securing Australia's Future synthesises the major themes that emerge from ACOLA's reports Each chapter includes key findings designed to optimise Australia's prosperity and place in the region The future is a long game but its base must be built now This book provides a vision for the nation for its politicians public servants and industry leaders a sound footing for securing Australia's future It is a vital resource for Members of Federal and State parliaments senior public servants industry leaders universities and the interested public

The Indian Mesozoic Chronicle Jai Krishna, 2017-03-11 The book reviews and summarizes the Indian Mesozoic geological evolution in an innovative alternative perspective of sequence stratigraphy It mainly focuses on the Jurassic interval but also concisely discusses the preceding Triassic and Cretaceous geological records The key to the study is primarily held in the recently developed ammonoid based high resolution scales in the Triassic and Jurassic period The Indian Jurassic record is thus elevated to a high resolution pedestal The large intra Jurassic stratigraphic gap in Kachchh with increase in duration from margin to basin has been precisely defined in different sections along with radical revision of its long held interpretation from sub aerial to sub marine all over from Arabia to Australia Other significant gaps are also differentiated into sub aerial and sub marine The Indian Late Precambrian Neogene record is organized into five mega sequences Among these the fourth also the most important one includes the intra Permian to Early Eocene interval from the origin to the closure of the Neotethys Based on multidisciplinary integration of the Indian Mesozoic geological record and comparison with hydrocarbon producing basins on east and west of India a highly positive scenario of the hydrocarbon source reservoir sediment perspective is outlined in the book in sequence stratigraphic backdrop as an edifice for future elaborate evaluation

Passive Margins K.R. McClay, J.A. Hammerstein, 2020-07-01 This volume has evolved from papers written in memory of Professor David Roberts They summarize the key findings of recent research on passive margins from tectonics bathymetry stratigraphy and sedimentation structural evolution and magmatism Papers include analyses of the central and southern Atlantic margins of South America and Africa papers on magmatism and extension in the NE Brazilian margin and on the Cote de Ivoire margin rift architectures of the NW Red Sea margin tectonics of the eastern Mediterranean margin salt tectonics of passive margins of the Gulf of Mexico and Brazil and papers on the NW Shelf margin of Australia The volume provides readers with new insights into the complexities of passive margin systems that are in reality not so passive

Asteroids Impacts, Crustal Evolution and Related Mineral Systems with Special Reference to Australia Andrew Y. Glikson, Franco Pirajno, 2018-03-12 This book presents a comprehensive overview of Australian impact structures and related mineralization including a discussion of the significance of many of these structures for crustal evolution The book focuses in particular on Archaean impact ejecta fallout units in the Pilbara Craton of Western Australia large exposed and buried impact structures and on the geophysical evidence for possible to probable impact structures Thanks to their long

term geological stability Precambrian and younger terrains in the Australian continent contain 38 confirmed impact structures and 43 ring and dome structures many of which constitute possible to probable asteroid impact structures The impact structures have been the subject of more than half a century of studies and range from several tens of meter large craters to buried structures larger than 100 km in diameter Discoveries of impact fallout units in the Pilbara Craton have defined the Pilbara as one of the two best documented terrains where Archaean impact ejecta fallout deposits are identified the other terrain being the Kaapvaal Craton in southern Africa A synthesis of evidence from both cratons indicates periods of large asteroid bombardments during 3 47 2 48 billion years ago including peak bombardment about 3 25 3 22 billion years ago The latter period coincides with an abrupt transformation of an early Archaean granite greenstone crust to mid to late Archaean semi continental crustal regimes underpinning the significance of heavy asteroid impact events for crustal evolution Apart from proven impact structures Australian terrains display a range of circular features including morphological and drainage rings circular lakes volcanic craters tectonic domes oval granite bodies mafic igneous plugs salt diapirs and magnetic gravity and seismic anomalies many of which are of a likely impact origin Thermal and hydrothermal processes associated with impact cratering bear important consequences for the formation of mineral deposits such as Ni at Sudbury Pb Zn at Siljan and Kentland Impact structures may also provide sites for the accumulation of hydrocarbons whereas in some instances fracturing associated with impact structures allows outward migration of oil and gas
