

OVERSEAS ROAD NOTES

The TRL Overseas Road Notes are a series of manuals and guidelines prepared for use by professionals working in the field of transport in developing countries and countries in transition. The information contained within the ORNs represents the most up to date thinking on good engineering, transport safety, environmental mitigation and transport planning practice applicable in such countries.

The Overseas Road Note series dates from 1981. They are an *ad hoc* series covering a range of topics reflecting the types of work being carried out at a particular time. They do not conform to any 'master plan' and are therefore numbered simply according to order of publication. The exception in the numbering system is Overseas Road Note 31. This originated in the TRL Road Note series as RN 31 and the number became firmly associated with the title. Thus, when the ORN series come into being and incorporated RN 31, the guide was allowed to retain its original number. Road Note 40, similarly, is an 'honorary' ORN that still carries its original RN number (but see below).

The Overseas Road Notes mostly remain current for many years and do not require regular updating. However, they are revised when necessary. ORN 3 was recently revised and is now published in its second edition. RN 40 is currently under revision and will shortly be reissued as ORN 40.
