DeLellis, Maria L. Carcangiu, William J. Frable, Giovanni Tallini, 2014 In the years since the publication of the third edition awareness of the remarkable morphologic diversity of thyroid carcinoma has notably expanded and great advances have been made in unravelling the molecular genetic features of thyroid and parathyroid tumours There has also been an increased interest in the use of the fine needle aspiration technique for the diagnosis and management of thyroid tumours and in the role of the pathologist in the operative handling of the hyperfunctioning parathyroid gland This volume documents the most significant advances that have taken place since the previous edition emphasising those with a practical application at the clinical level The format remains similar to that of the previous versions but the two thyroid and parathyroid editions have been merged into one and most of the black and white images and photomicrographs have been replaced with colour The authors include a number of the most recent references but have not ignored the classic works in the field many of which have descriptions illustrations and insights that cannot be bettered This edition fulfils the original goal of this series which is that of helping the pathologist diagnose and anticipate the behavior of the tumours and tumour like lesions included in this publication **WHO Classification of Tumours of Endocrine Organs** Ricardo V. Lloyd, Robert Y. Osamura, Günter Klöppel, Juan Rosai, 2017 The WHO Classification of Tumours of Endocrine Organs is the 10th volume in the 4th Edition of the WHO series on histological and genetic typing of human tumours This authoritative concise reference provides an international standard for oncologists and pathologists and will serve as an indispensable guide for use in the design of studies evaluating response to therapy and clinical outcome Diagnostic criteria pathological features and associated genetic alterations are described in a disease oriented manner Sections on all recognized neoplasms and their variants include new ICD O codes epidemiology clinical features pathology genetics prognosis and predictive factors The book prepared by 166 authors from 25 countries contains more than 700 color images and tables and more than 3100 references WHO Classification of Tumours of the Lung, Pleura, Thymus and Heart William D. Travis, Elisabeth Brambilla, Allen Burke, Alexander Marx, Andrew G. Nicholson, 2015 This authoritative concise reference book provides an international standard for oncologists and pathologists and will serve as an indispensable guide for use in the design of studies monitoring response to therapy and clinical outcome **Endocrine Pathology** Lester D. R. Thompson, 2006 With abundant at a glance tables the volume reviews normal histology before examining abnormal findings covers all of the most commonly seen neoplastic and non neoplastic conditions of the endocrine system and uses a consistent user friendly format to explore each entity s clinical features pathologic features gross and microscopic ancillary studies differential diagnoses and prognostic and therapeutic considerations Heavily illustrated Tumors of the Pancreas Ralph H.

Hruban, Martha Bishop Pitman, David S. Klimstra, 2007 In this new edition the authors succinctly summarise clinical literature but also concentrate on both new entities and new concepts described since the publication of the third series ten years ago The illustrations with the exception of radiographs and electron micrographs are in colour and tumours are presented in detail The continuing importance of tumour morphology in directing molecular studies is appropriately emphasised In addition to the extensive discussion illustrations and up to date referencing of the numerous pancreatic tumours and tumour like lesions important discussions have been provided on normal gross histologic and cytologic findings and on pancreatic tumour staging These discussions complement the authors treatment of the often confusing issue of frozen section interpretation dissection and reporting of pancreatic resection specimens and an unknown pancreatic biopsy or cytology specimen This volume should be the definitive reference on pancreatic tumour for years to come [International Agency for Research on Cancer.
