

# EPIC LEVEL CHARACTERS

This listing of epic level characters may be used and changed how the reader seems fit. In fact I may need it as I do not use proper language but just follow the logical path. I just felt like it needed to be put down upon paper. I used the idea of having a racial ability from level that I saw another had done. That said this needs to be play tested further. Although throughout I just added improved before things because it saves the slot for epic in case someone want to do a 41-60 level character book. Also it is a quick way to reference that it replaces the skill or feature in an intuitive way.

**Stat Bumps in epic levels are different.** You now have access to epic level feats. Furthermore these stat bumps can increase stats up to 30. If your character have gotten one of the tomes that increases the max or the barbarian ability; you can now increase it to 30 plus that amount.

**Stat Bumps are at level 24,28,32, 36, 39.**

These haven't really been balanced but then epic level characters shouldn't be balanced they are on the route of becoming gods. So everything follows a logical progression with some cool ideas.

**Proficiency Bonus:** Proficiency follows the same natural progression that it did before as follows: Level 21-24: +7, level 25-28: +8, level 29-32: +9, level 33-36: +10, level 37-40: +11.

**Level progression:** levels take even longer than they did previous of epic levels as epic levels are even harder to progress in.

**Subclass progression:** There are only 3 boosts to a subclass and this is partly on my part. Each class has at least 5 subclasses. That is 180 extra abilities. They progress at levels 22, 27, and 38. That is how it worked out for the first class. Paladin is the exception because they needed a finisher.

**Racial Paragon Ability:** level 31 you gain a racial ability based on what race that you have. These are all pretty powerful as they come somewhat late and they only ability you get based on race. This is total class level 31. Even though I put it on the different class lists just as a reminder. So it is like proficiency bonus in that way.

**Spell levels:** Spell levels progress normally but stay within levels 1-9. Spell casters do get to create epic spells when they level up at specific times within the class. The way to determine epic spells for multiclassing is kind of hard though. If you multiclass say a wizard 20/ bard 20 you miss out on epic level spells. Epic level spells will have examples toward the end of this pdf but for the most part they are created between the dm and the player. So everyone will have different levels of power for epic level spells unless the dm decides to only use the examples given which is not recommended because that seems boring. Other than not having epic level spells multi-classing spellcasters do get increased 1-9 level spells still.

When making an epic spell the level you are at matters. Also epic spells cannot be countered, dispelled, or in anyways affected by level 1-9 spells and cantrips. So in other words a 9th level counterspell would automatically fail against an epic spell. You could make an epic counterspell which would work. Further more if an effect says something like "resistance to damage against spells" it doesn't mean epic spells unless it specifies as such.

So I realize that with natural progression multiclass characters seem to miss out on power but they have more versatility.

Nevertheless however you think I did the balancing of epic levels they are way more powerful than their low level counterparts. So I think nobody will be mad because every level 40 is powerful in their own right.

Cantrips follow logical progression. They get better at 5th, 11th, 17th, 23rd, 29th, and 35th level. If people are bothered by me not doing them I could include a list of the cantrips later but that is the route that I am following.

Experience is as follows:

CHARACTER ADVANCEMENT		
Experience Points	Level	Proficiency Bonus
415,000	21	+7
475,000	22	+7
545,000	23	+7
