## **Hydropolitics Water Policy And Conflict:**

**Hydropolitics in the Third World** Arun P. Elhance, 1999 With more than 50 percent of the world's landmass covered by river basins shared by two or more states competition over water resources has always had the potential to spark violence And growing populations and accelerating demands for fresh water are putting ever greater pressures on already scarce water resources In this wide ranging study Arun Elhance explores the hydropolitics of six of the world's largest river basins In each case Elhance examines the basin's physical economic and political geography the possibilities for acute conflict and efforts to develop bilateral and multilateral agreements for sharing water resources The case studies lead to some sobering conclusions about impediments to cooperation but also to some encouraging ones among them that it may not be possible for Third World states to solve their water problems by going to war and that eventually even the strongest riparian states are compelled to seek cooperation with their weaker neighbors

**Hydropolitics** Leif Ohlsson, 1995 As well as a major overview of the global situation and problems involved there are authoritative case studies of particular river systems in three continents including the Nile Valley the Tigris and Euphrates the River Jordan the Mekong and several cases from South Asia

**Managing and Transforming Water Conflicts** Jerome Delli Prisco, Aaron T. Wolf, 2010-02-04 What is the one thing that no one can do without Water Where water crosses boundaries be they economic legal political or cultural the stage is set for disputes between different users trying to safeguard access to a vital resource while protecting the natural environment Without strategies to anticipate address and mediate between competing users intractable water conflicts are likely to become more frequent more intense and more disruptive around the world In this book Delli Prisco and Wolf investigate the dynamics of water conflict and conflict resolution from the local to the international They explore the inexorable links between three facets of conflict management and transformation Alternative Dispute Resolution ADR public participation and institutional capacity This practical guide will be invaluable to water management professionals as well as to researchers and students in engineering economics geography geology and political science who are involved in any aspects of water management

*Water Conflicts and Resistance* Venkatesh Dutta, 2021-07-29 This book presents a systematic study of transboundary regional and local water conflicts and resistance across several river basins in South Asia Addressing hydro socio economic aspects in competing water sharing and transfer agreements as well as conflicting regimes of legal plurality property rights and policy implementation it discusses themes such as rights over land and natural resources resettlement of dam displaced people urban rural conflicts over water allocation peri urbanisation land use conflicts and water security tradeoffs and constraints in restoration of ecological flows in rivers resilience against water conflicts in a river basin and irrigation projects and sustainability of water resources Bringing together experts professionals lawyers government and the civil society the volume analyses water conflicts at local regional and transboundary scales reviews current debates with case studies and outlines emerging challenges in water policy law governance and institutions in South Asia It also offers

alternative tools and frameworks of water sharing mechanisms conflict resolution dialogue and models of cooperation and collaboration for key stakeholders towards possible solutions for effective equitable and strategic water management This book will be useful to scholars and researchers of development studies environment studies water studies public policy political science international relations conflict resolution political economy economics sociology and social anthropology environmental law governance and South Asian studies It will also benefit practitioners water policy thinktanks and associations policymakers diplomats and NGOs

**Transboundary Water Management** Anton Earle, 2013 The management of water resources across boundaries whether sub national or international is one of the most difficult challenges facing water managers today The upstream exploitation or diversion of groundwater or rivers can have devastating consequences for those living downstream and transboundary rivers can provide a source of conflict between nations or states particularly where water resources are scarce Similarly water based pollution can spread across borders and create disputes and a need for sound governance This book is the first to bring together in a concise and accessible way all of the main topics to be considered when managing transboundary waters It will raise the awareness of practitioners of the various issues needed to be taken into account when making water management decisions and provide a practically based overview for advanced students The authors show clearly how vital it is to cooperate effectively over the management of shared waters to unlock their contribution to regional sustainable development The book is largely based on a long running and tested international training programme run by the Stockholm International Water Institute and Ramboll Natura and supported by the Swedish International Development Co operation Agency Sida where the respective authors have presented modules on the programmes It addresses issues not only of conflict but also of managing power asymmetries benefit sharing stakeholder participation international water law environmental water requirements and regional development It will be particularly useful for those with a background in hydrology or engineering who wish to broaden their management skills

**Conflict and the Environment** N.P. Gleditsch, 1997-09-30 The end of the Cold War has opened up the arena for increased attention to other lines of conflict both in Europe and globally Environmental disruption by no means a new phenomenon is a chief beneficiary of the shift in priorities in the public debate The Scientific and Environmental Affairs Division of NATO has moved with the times and has defined environmental security as one of the priority areas for its cooperation with Central and Eastern Europe and countries of the former Soviet Union Research on these issues is now thus very much a collaborative effort across former lines of division in Europe The Introduction by Sverre Stub sets the tone Our Future Common or None at All The book reveals the very real risks associated with environmental degradation whether of the land waters or the oceans and charts out previous disputes and points to the very real danger of violent conflict associated with the drying up of natural resources The book ends with a section on Responses which seeks to provide answers to the threats discussed in the preceding sections
