A Healthy and Delicious Way to Better Health. Heart disease, diabetes, weight gain, and chronic pain. These all share one common attribute: they are frequently caused or worsened by chronic inflammation. While inflammation may be an important part of the immune system, with the modern world pushing an abundance of sugar, refined grains, artificial ingredients, preservatives, and food dyes into our diets, our body's natural inflammation fights back. This fight causes increased levels of long-term inflammation that are known to damage our own cells, causing and worsening disease in the process. You may have chronic inflammation if you struggle to get a decent sleep at night, your weight is unmanageable, you experience high stress and poor moods, you frequently struggle with aches and pains, or you have one of the most common diseases. These struggles plague our lives despite the modern medical science available to Western countries. Despite the medical marvels, the rate of death by disease only continues to increase, with the next generation predicted to have fewer years than the previous generation. This is a major problem. Sullivan,2020-01-20 The Complete Anti Inflammatory Diet for Beginners Hand Picked 30 Day Meal Plan Unfortunately the average diet of most of the Western world does little to combat chronic inflammation while at the same time doing plenty to help it along This includes things like a distinct lack of omega 3 fatty acids as they are rarely found in the processed food that is growing increasingly more prevalent worldwide Unfortunately these processed foods do contain a large amount of omega 6 fatty acids and this imbalance specifically is known to cause an increase in the amount of inflammation that a person experience What s worse the lengths that most people have to go to on a regular basis to ensure they are eating nutritious foods that have not been processed makes it difficult for them to do so regularly This is where the anti inflammatory diet comes in as it makes it easier for individuals to know that what they are eating is actively reducing the inflammatory buildup that they have been experiencing for years prior to the switch A big reason for this is phytochemicals naturally occurring chemicals that are found in many of the foods suggested in chapter 3 which are all known to reduce inflammation to various degrees While the primary use for the diet isn t weight loss the focus on natural healthy meals with reasonable portion sizes means that many individuals do experience a degree of weight loss This is especially true when it comes to those who previously consumed a higher than average amount of processed foods This is a naturally occurring phenomenon that comes about when a person decides to eat fewer carbohydrates unhealthy oils and trans fats while at the same time filling up on healthy alternatives instead and there is no
