BUSINESS AND ECONOMICS course MANAGEMENT language English abstract Effective inventory management is a tool to run the organization properly. Therefore, assessments of inventory management have a vital role. This is the reason why the study is conducted. To conduct this research, applying descriptive research is believed to be appropriate. In this study, census was used because it increases research quality and the population size is less than 100. To get relevant data, both primary and secondary data were collected. After the data collection process ends, it was analyzed by descriptive statistics like percentage and table. This study was conducted in ArbaMinch University. Based on the findings of the study, the researcher forward feasible recommendation so as to help the organization overcome its inventory management related problems. The major finding of the study indicates that the inventory management practices of the university were poor. **Computerized Maintenance Management Systems Made Easy : How to Evaluate, Select, and Manage CMMS** Kishan

Bagadia, 2006-06-27 Computerized Maintenance Management Systems Software programs are increasingly being used to manage and control plant and equipment maintenance in modern manufacturing and service industries. However, 60% to 80% of all programs fail because of poor planning costing millions of dollars. Written by an expert with over 30 years of experience, this book employs a step by step approach for evaluating the company's needs, then selecting the proper CMMS.
