Data-Driven Decision Making in Entrepreneurship Nikki Blacksmith, Maureen E. McCusker,2024-04-02 Since the beginning of the 21st century there has been an explosion in startup organizations Together these organizations have been valued at over 3 trillion In 2019 alone nearly 300 billion of venture capital was invested globally Global Startup Ecosystem Report 2020 Simultaneously an explosion in high volume and high velocity of big data is rapidly changing how organizations function Gone are the days when organizations can make decisions solely on intuition logic or experience Some have gone as far as to say that data is the most valuable currency and resource available to businesses and startups are no exception However startups do differ from their larger counterparts and corporations in three distinct ways 1 they tend to have fewer resources time and specialized training to devote to data analytics 2 they are part of a unique entrepreneurial ecosystem with unique needs 3 scholarship and academic research on human capital data analytics in startups is lacking Existing entrepreneurship research is primarily conducted in business schools There needs to be more integration of industrial organizational psychology and entrepreneurship This book was designed to do just that to demonstrate how organizational psychology with a focus on human capital data and analytics can advance the science and practice of entrepreneurship This book is purposefully designed to address the unique idiosyncrasies of the science research and practice of startups and the entrepreneurial

ecosystem Each chapter takes a science practice perspective highlighting a specific human capital management topic e g learning and development team effectiveness human capital due diligence and discusses how leveraging data can help enhance decision making The volume is grounded in sound theory and practice of organizational psychology entrepreneurship and management It is divided into three parts 1 human capital assessment and development for startups 2 understanding startup situations environments and support systems and 3 measuring startup level performance

Linda Shirato,1993 Triggers and Ranked Keyword Searches Over Virtual XML Views Feng Shao,2007 Current systems that publish XML relational data using XML views are passive in the sense that they can only respond to user initiated queries over the XML views Further existing systems do not support ranked keyword searches over virtual XML views which is important for exploring and retrieving information from large views In this dissertation we propose an XML view system whereby users can place active triggers on virtual unmaterialized XML views and can efficiently evaluate keyword search queries over such views In this architecture we present scalable and efficient techniques for processing triggers over nested views by leveraging existing support for SQL triggers over flat relations in commercial relational databases When evaluating the keyword search queries our approach exploits indices present on the base data and thereby avoids computing large parts of the view that are not relevant to the query results Another feature of the algorithm is that it supports top k results for queries over the virtual view and the resulting rank order is the same as if the view was materialized We have implemented our proposed techniques in the context of the Quark XML middleware system Our performance results indicate that our proposed techniques are a feasible approach to supporting triggers and ranked keyword searches over virtual XML views Abstract *Handbook of Research on Web Log Analysis* Bernard J.
