vocabulary Accordingly a linguistic theory which explains how and why the sentences are should start with the cognition The method is opposite to that of Aristotle s tradition which begins in the form and the contents are interpreted from the form based on the view that language is a tool of communication regarding only the communicated words as language The same view is also found in F de Saussure who regarded language as a given and socially approved system of signs Language is not a system of signs but what we generate just in the next moment If we shut up language does not exist The system or grammar may change with our usage of words moment by moment thus language continues to change as long as it is spoken Consequently this work finds the DEEP and UNIVERSAL STRUCTURE of sentence in the structure of the four dimensional cognition First we deduce what structure is necessary to express the four dimensional cognition Secondly we see how we generate the surface structures in five languages English Spanish Chinese Japanese and Ainu We define each word in syntactic tree diagrams just like chemical formulas to verify the deep structure in the surface structure The Syntax Workbook Andrew Carnie,2012-06-21 The Syntax Workbook was written as a response to the students and instructors who over the years have requested more problem sets that give greater experience in analyzing syntactic structure Aligned chapter by chapter with Carnie s bestselling textbook this workbook provides over 120 new exercises on all of the major topics in generative syntax An all new workbook to accompany the bestselling syntax textbook Syntax A Generative Introduction which answers the need for a practical text in this field Features over 120 problem sets with answers designed to give students greater experience of analyzing syntactic structure Exercises and topics covered includes phrase structure the lexicon Case theory ellipsis auxiliaries movement covert movement locality conditions VP shells and control Supported by expanded online student and instructor resources including extra chapters on HPSG LFG and time saving materials for lecturers including problem sets PowerPoint slides and an instructors manual Structured to reflect the style and chapter by chapter coverage of the textbook but its practical reader friendly layout also makes it suitable for use as a stand alone Workbook **Finding Program Differences Based on Syntactic Tree Structure** Carol Sue Beckman-Davies,1989

*English Syntax Tree Diagram* Yuko Sakai,2017-06-21 In this work we try to verify that English sentences are restricted and limited by the space time structure of cognition which may be the universal sentence structure while a sentence expresses a thought or cognition We see the reason why sentences vary in English explaining each sentence in a syntax tree diagram which is not based on form but on contents logically in sentence generation **An Algorithm for Generating Abstract Syntax Trees** Institute for Computer Applications in Science and Engineering,R.
