GENERAL INFORMATION

For safe handling information on this product, consult the Safety Data Sheet, (SDS).

Not for product specifications

The technical data contained herein are intended as reference only. Please contact your local quality department for assistance and recommendations on specifications for this product.

Pre-treatment:

The substrate should be clean, dry, free of dust, oil, grease and other contaminants.

Application:

Application Temperature: 210 to 250°C

When bonding to a substrate with high thermal conductivity the use of a specific application temperature is required for good wetting. Do not heat the product above the specified application temperature range.

When the product is not in use do not apply heat, this will degrade the quality of the product and in extreme cases cause carbonization. TECHNOMELT PA 6344 (e) may absorb moisture from the air. This will not be apparent in the solid form, but may cause bubbles on heating and could affect the bond quality. It is important, therefore, that containers are kept closed and sealed when not in use.

Cleaning:

Carbonized and set (non thermoplastic) material must be removed mechanically. Removal of the thermoplastic material from the hot apparatus can be achieved with solvent free cleaning system, such as Technomelt PA 62 (see separate technical information).

Storage:

Store in a cool, dry location, with the container tightly closed. Storage information may be indicated on the product container labeling.

Packaging

TECHNOMELT PA 6344 (e) is supplied in round bed form for ease and handling. This product comes packaged in plastic lined boxes containing 40 pounds net.
