many regional leagues were started, then dissolved. At this point in history, baseball was not a very lucrative business, and few teams were able to make money. In the late 1880s, the National League attempted to limit the salary that players could accept to a maximum of \$2,000.

During the early period of league formation, rules for transferring players from one league to another were created. There were also strict rules for recruiting minor league players for the major leagues. At present, all major league teams maintain minor league teams called "farm clubs" where players are trained and may be transferred to a major league.

In 1903, the first World Series was held. It was held every year since until the baseball strike of 1994. Today, baseball, despite the impact of the strike, continues to be a highly-organized and lucrative sport. The salaries of baseball players are amongst the highest of all athletes who play team sports.

HOW THE GAME IS PLAYED

THE RULES OF THE GAME

In baseball, two teams of nine players compete with one another on a baseball "diamond" which in reality is a square field. The teams are comprised of a pitcher, catcher, a first, second and third baseman, a shortstop, and left, center and right fielders.

A catcher squats behind the batter and signals the pitcher as to what type of ball to throw. Each game is made up of nine innings. If the home team is ahead (that is, if it has scored more runs) at the end of the middle of the ninth inning, the home team wins.

Srigiri,2023-04-01 The recurring theme Augustine and Time holds sway in both academic and popular works However most of the efforts focus on his Confessions XI unfortunately neglecting the rest of his corpus Even in a cursory reading of it a twin factor stands out and it permeates the entire corpus The cluster of temporal notions he uses holds many more beyond the concepts of time and eternity and its being posited in the cognition of the human mind This serendipitous observation necessitates a hermeneutical probe into the inextricable link between temporal notions and human cognition Taking the untrodden path this probe begins with an analysis of Augustine s conversion narrative since the inseparable intertwining of temporality and human cognition is first observable in the philosophical and theological matters he experienced then The cognitive capabilities for perception belief and language and the mind s concern with reality rationality and relationality are examined to show the way human cognition gives rise to complex temporality rather than just the notions of time and eternity The Appendix argues Augustine and Neuroscience could dialogue on temporality in human cognition
