

## INTRODUCTION

This handout complements the Click and Learn “Virus Explorer” developed in conjunction with the 2016 documentary, *Spillover: Zika, Ebola & Beyond* (<http://www.htmi.org/biointeractive/virus-explorer/>).

## PROCEDURE

Follow the instructions as you proceed through the Click and Learn, and answer the questions in the spaces provided.

1. Let’s review. Click on the “About” tab at the bottom. Read the information and list four (4) ways in which viruses can differ from each other.

Viruses can differ by:

- structure
- transmission mechanism
- genome type
- host type

2. This interactive uses several abbreviations. Fill in what each abbreviation stands for in the table below.

Abbreviation	Description
nm	Nanometer
bp	Base pairs
ss	Single-stranded
ds	Double-stranded

3. Close the “About” window, and locate the  next to each viral characteristic tab across the top. Click on these icons and answer the questions below associated with each viral characteristic.

a. **Envelope:** Not all viruses have an envelope. If a virus has this outer layer, explain how it forms. If a virus has an envelope, then its formation was caused by the virus exiting the host cell via budding from the cell’s surface. When this happens, the membrane of the host cell “envelopes” the virus, thus forming an outer layer (a.k.a. the envelope). The envelope contains embedded viral proteins.
