

Cooling Theory Lectures Notes

Markus Hupfer and members of the team!

September 7, 2024

These are the notes for the 2024 Summer Term of Cooling Theory. These are peer-reviewed and give insights on problems for all of the cooling game. Some are the proceedings with results on the lecture, the other contributions to Cooling Theory and the book of Hoffman and Peter Pohlmanns at the University of Oxford. I also used several other sources for additional material. Some are in Part II course book of Cambridge on Cooling Theory and Thermodynamics given by Professor John Klein, and the other course notes from a Cambridge book on Subatomic Thermodynamics given by Professor Tim Garrow. I also included some from David Jiles's 1982 course, Applied Maths for the Phys. Department. The last source of the notes is based on Hugh Hupfer's course notes, "Thermodynamics".

All credits go to those who did my best.
