AI in Social Studies Education Christopher H. Clark,Cathryn van Kessel,2025 The introduction of widely available generative AI tools has caused a frenzy of both positive and negative reactions Between utopian visions and apocalyptic predictions of AI s impact on education there is a need to thoughtfully consider what education in the age of AI can and should look like This volume focuses on the implications of AI technology for teachers in K 12 and university settings providing a careful look at its affordances and drawbacks for social studies curriculum and teaching Scholars specializing in the field of social studies education provide information and practical ideas for teaching with current technology alongside frameworks for thinking about future iterations of AI This book fills a critical need especially among educators to consider the current and potential future impacts of AI while avoiding the traps of alarmism or techno utopianism Whether skeptical or enthusiastic about AI every social studies educator will find something useful to their practice in this book Book Features First ever compilation of AI considerations and strategies in the context of social studies education Nontechnical explanations of what AI can do and not do in practical educational contexts to enable educators to approach its use with careful judgment Advice for educators to help them assess future iterations of AI technology Critical considerations of AI across

multiple contexts e.g. ethics, equity, multilingual learners, cybersecurity. Work from leaders in technology and social studies education across Canada and the United States. Contributors: Erin C. Ethical, Legal, and Pedagogical Perspectives on AI in Education Carlson, Kristen, 2026-01-21. The rapid integration of AI in the educational environment is transforming how students learn and schools operate. While AI is a great prospective for personalized learning and expanded access to education, its widespread adoption also raises significant ethical, legal, and pedagogical concerns. Issues such as data privacy, biases, and the evolving role of educators demand scrutiny. Understanding these dimensions is essential to ensure that AI is implemented in ways that are transparent and supportive of meaningful learning experiences. *Ethical, Legal, and Pedagogical Perspectives on AI in Education* explores the ethical, legal, and pedagogical dimensions of how AI is transforming education. This book examines how technological advances have reshaped education systems and the benefits and challenges of these advancements. Covering topics such as AI ethics and education, this book is an excellent resource for educational researchers, teachers, students, policymakers, administrators, academicians, and more.

Born-Digital Texts in the English Language Classroom Saskia Kersten, Christian Ludwig, 2024-06-11. This book is the first to focus specifically on born-digital texts in EFL teaching, uniting international and innovative scholarship with practical classroom applications. The book develops a theoretically sound framework for curriculum materials and methods design that takes into account the growing ubiquity of born-digital texts in the digital age. It covers a broad variety of born-digital text types, including those generated by AI, which so far have not been an explicit focus in the context of language teaching, while also providing a grounding in current discussions around digital tools in education. The chapters cover a wide range of issues, from methodological approaches to born-digital texts to curriculum syllabus and materials design. The book will be a valuable introduction to the subject for trainee and practising teachers, as well as teacher educators and students on EFL courses. Chapter 7 is free to download as an open access publication under a CC BY licence and is available here: <https://zenodo.org/records/11174197>.
