The **T**ransportation and **C**ivil Engineering (TRAC) Program

THE PURPOSE OF TRAC: The TRAC program is a new and innovative way of introducing students to the wide variety of career opportunities available in the field of engineering. The program teaches secondary students how to apply a variety of math and science concepts to common engineering problems occurring in transportation systems. The TRAC program is also designed to allow the students to identify and evaluate the social and environmental impacts associated with the development of new transportation systems within their communities.

PROGRAM DESIGN: TRAC is designed to be an extended activity created from the Transportation Research Activities Center or TRAC PAC 2. The TRAC PAC 2 includes electronic components to collect and analyze data, and software programs to graph results and test a series of models. The developed activities are designed to show students how to use the tools listed above to solve real-life problems associated with transportation.
