

## 3406

The Cat 3406 is an in-line, six-cylinder diesel built to last, with major components offering an exceptionally high strength-to-weight ratio. With power ratings from 199-392 kW (267-525 bhp), this hard-working powerhouse offers reliable power for a wide range of heavy-duty applications.

### Lasting Performance is Built In

The one-piece cylinder heads resist twisting and flexing that can cause head gasket problems and coolant leaks. A steel spacer between the head and block eliminates the need for liner counterbores, greatly enhancing the strength and fatigue life of the block.

The forged steel crankshaft is uniquely heat-treated in a process developed and patented by Caterpillar. Then it is dynamically balanced and super-finished. The crankshaft's high fatigue strength means it can be reground up to three times.

Hard-faced intake and exhaust valves resist wear at high heat, while the chrome-plated stems help guard against seizure. Valves rotate three degrees each lift, assuring good seating and uniform temperature distribution.

### Simplified Service and Maintenance

The direct injection fuel system uses adjustment-free injection nozzles. Spin-off fuel and lube filters, and clamp-on air filters speed routine maintenance procedures.
