

A synchronous counter can be designed by using master-slave JK flipflops. Design a 4-bit synchronous counter. Circuit diagrams for the synchronous counter and the JK flipflop are given below. The clear signal is active low. Data gets latched on the positive edge of clock, and the output of the flipflop appears on the negative edge of clock. Counting is disabled when count\_enable signal is low. Write the dataflow description for the synchronous counter. Write a stimulus file that exercises clear and count\_enable. Display the output count Q[3:0].

**Figure 6-5. Master-Slave JK-flipflop**

### Binary 4-bit Synchronous Up Counter
