## Bubble and Foam Chemistry

This collaboration guide will equip the reader with a thorough understanding of the complete field of foaming chemistry. Requiring only basic theoretical background knowledge, the book provides:

- A straightforward introduction to the principles and properties of foams and foaming surfactants, underpinning the key ideas about why foaming occurs, how it can be assessed and how different degrees of performance can be achieved.
- The latest test methods, including laboratory and industrial developed techniques.
- Details on a variety of different kinds of foams, from wet detergents, food foams, to pigments, medical and rigid foams, which connect theory to real world applications and recent developments in foam research.

Combining academic and industrial viewpoints, the book is the definitive stand alone resource for researchers, students, and industrialists working on foam technology, colloidal systems in the fields of chemical engineering, fuel technology, physical chemistry, and applied physics.

**Robert J. Pugh** is a Visiting Professor at Nottingham Trent University. He is an active member of the foams community and has almost 20 years' experience in industry, having worked as a foam specialist for Dow Chemicals and Unilever Research. He has also acted as a consultant for Argus Flow, Huls, Hulsel, Hulsel, GlaxoSmithKline, Procter and Gamble, and Arpaire Chemicals. He has edited two previous books in the field of surface and colloid science and has authored several highly cited review papers on the topic of foams and foaming.

**Colloids and Interfacial Dynamics** Mineo Hashizume,Yoshiro Imura,2025-09-07 This book presents the dynamics of colloids and interfaces in various materials such as assemblies of surfactants lipids nanoparticles and surfaces of biomaterials catalysts and engineering materials It covers a wide range of topics from basics to applications on fabrication

functions and understanding the mechanisms of those systems The book highlights the importance of understanding from the perspective of colloidal and interfacial chemistry for the materials exhibiting dynamic behaviors Readers can find a new direction for the development of nano stimulus responsive systems consisting of molecular assemblies by understanding the relationships between the dynamics of molecules the dynamics of molecular assemblies and the dynamics of the functions of molecular assemblies Also the book provides useful knowledge for the development of new photocatalysts through a detailed explanation of the complex dynamics of electron transfer on the catalyst surface The authors hope that common denominators will be found in different materials from the perspective of the dynamics of colloids and interfaces and that readers will find guidelines for the development of new nanomaterials
