developing a model that can be used to measure current levels of maturity In addition BPM related benefits are identified such as increased effectiveness efficiency or quality Increased BPM maturity is characterised as being correlated with an increased probability of achieving these benefits An increased maturity can lead to a decreased gap between objectives and a current situation Objectives are also more likely to be met due to less varying results and therefore greater ability to predict results The organisation wide deeper understanding of how the business is conducted results in work being more consistent and repeatable and as a result more effectively and efficiently Other benefits of the model are the ability of the organisation to determine strengths and weaknesses in current applications In doing this the organisations see benefits in being able to expand knowledge sharing within the organisation by learning from the successes within its own self
