Professor D'Atri pursued the development of an interdisciplinary culture in which social sciences, systems design, and human sciences are mutually integrated. Rather than retrospection, this book is aimed to advance in these directions and to stimulate a debate about the potential of design research in the field of information systems and organization studies with an interdisciplinary approach. Each chapter has been selected by the Editorial Board following a double-blind peer review process. In addition, several chapters contribute to the meta-discourse on design science research. **ACM**

In the early 1970s when the book *Formal Languages* by the second mentioned editor appeared, it was still quite feasible to write a comprehensive book with that title and include also topics of current research interest. This would not be possible anymore. A standard-sized book on formal languages would either have to stay on a fairly low level or else be specialized and restricted to some narrow sector of the field.
