Fortune Tellers Walter A Friedman,2013-12-01 A gripping history of the pioneers who sought to use science to predict financial markets The period leading up to the Great Depression witnessed the rise of the economic forecasters pioneers who sought to use the tools of science to predict the future with the aim of profiting from their forecasts This book chronicles the lives and careers of the men who defined this first wave of economic fortune tellers men such as Roger Babson Irving Fisher John Moody C J Bullock and Warren Persons They competed to sell their distinctive methods of prediction to investors and businesses and thrived in the boom years that followed World War I Yet almost to a man they failed to predict the devastating crash of 1929 Walter Friedman paints vivid portraits of entrepreneurs

who shared a belief that the rational world of numbers and reason could tame or at least foresee the irrational gyrations of the market. Despite their failures, this first generation of economic forecasters helped to make the prediction of economic trends a central economic activity and shed light on the mechanics of financial markets by providing a range of statistics and information about individual firms. They also raised questions that are still relevant today: What is science and what is merely guesswork in forecasting? What motivates people to buy forecasts? Does the act of forecasting set in motion unforeseen events that can counteract the forecast made? Masterful and compelling, *Fortune Tellers* highlights the risk and uncertainty that are inherent to capitalism itself.

Management Education in India Manish Thakur, R. Rajesh Babu, 2016-08-08. This volume problematizes different facets of management education in India: pedagogy, curricula, and disciplinary and institutional practices from the perspective of the Global South. The essays in this volume bring out the institutional challenges of crafting a relevant academic programme that converses with both national specificities and global realities. Coming from diverse academic specializations, the contributors traverse the interface of their respective disciplines with management education. In doing so, they engage with the ongoing global debate on management education. This volume fills a noticeable gap of serious scholarly reflection on the state of management education. While there have been sporadic reflections and occasional critiques, a critical stocktaking of the institutional and disciplinary aspects of management education has been long wanting. This volume is of interest to scholars and practitioners of management education across the globe and is likely to generate debate on its contemporary relevance and future trajectory.
