Born-Digital Texts in the English Language Classroom Saskia Kersten, Christian Ludwig, 2024-06-11. This book is the first to focus specifically on born-digital texts in EFL teaching, uniting international and innovative scholarship with practical classroom applications. The book develops a theoretically sound framework for curriculum materials and methods design that takes into account the growing ubiquity of born-digital texts in the digital age. It covers a broad variety of born-digital text types, including those generated by AI, which so far have not been an explicit focus in the context of language teaching, while also providing a grounding in current discussions around digital tools in education. The chapters cover a wide range of issues, from methodological approaches to born-digital texts to curriculum syllabus and materials design. The book will be a valuable introduction to the subject for trainee and practising teachers, as well as teacher educators and students on EFL courses. Chapter 7 is free to download as an open access publication under a CC BY licence and is available here: <https://zenodo.org/records/11174197>.
