

## *Hayek's Monetary Version of Over-Investment Theory:*

- Hayek based his theory of the trade cycle on Wicksell's theory of the income determination.
- Wicksell had analyzed the equilibrium of the economic system with the help of a distinction between the natural rate and money rate of interest.
- Natural rate of interest is that at which the demand for loanable funds equals the supply of loanable funds.
- Natural rate of interest shows the equilibrium state of the economy. Money rate of interest, on the other hand, is that which actually prevails in the market at a particular time.
