## Headway Fourth Edition Unit 1:

Handbook of Road Technology, Fourth Edition M. G. Lay, 2009-06-11 This fully revised fourth edition of Max Lay's well established reference work covers all aspects of the technology of roads and road transport and urban and rural road technology. It forms a comprehensive but accessible reference for all professionals and students interested in roads, road transport and the wide range of disciplines involved with roads. International in scope, it begins with the preliminary construction procedures from road planning policies and design considerations to the selection of materials and the building of roads and bridges. It then explores road operating environments that include driver behaviour, traffic flow, lighting and maintenance, and assesses the cost, economics, transport implications and environmental impact of road use. It draws on Max Lay's unparalleled consulting and operational experience in the financing, planning, design, construction, operation and management of roads in various countries. It forms an indispensable resource for transport planning, engineering, operations and economics.

*The Routledge Handbook of English as a Lingua Franca* Jennifer Jenkins, Will Baker, Martin Dewey, 2017-08-23 The Routledge Handbook of English as a Lingua Franca (ELF) provides an accessible, authoritative and comprehensive introduction to the main theories, concepts, contexts and applications of this rapidly developing field of study. Including 47 state-of-the-art chapters from leading international scholars, the handbook covers key concepts, regional spread, linguistic features and communication processes, domains and functions of ELF in academia, ELF and pedagogy, and future trends. This handbook is key reading for all those engaged in the study and research of English as a lingua franca and world global Englishes, more broadly within English language applied linguistics and education.

*The Multilingual Turn* Stephen May, 2013-07-24 Drawing on the latest developments in bilingual and multilingual research, *The Multilingual Turn* offers a critique of and alternative to still dominant monolingual theories, pedagogies and practices in SLA, TESOL and bilingual education. Critics of the monolingual bias argue that notions such as the idealized native speaker and related concepts of interlanguage, language competence and fossilization have framed these fields inextricably in relation to monolingual speaker norms. In contrast, these critics advocate an approach that emphasizes the multiple competencies of bi/multilingual learners as the basis for successful language teaching and learning. This volume takes a big step forward in re-situating the issue of multilingualism more centrally in applied linguistics and in so doing making more permeable its key sub-disciplinary boundaries, particularly those between SLA, TESOL and bilingual education. It addresses this issue head-on, bringing together key international scholars in SLA, TESOL and bilingual education to explore, from cutting-edge interdisciplinary perspectives, what a more critical multilingual perspective might mean for theory, pedagogy and practice in each of these fields.
