Freight Forwarding and Multimodal Transport Contracts David A. Glass, 2004 A valuable source of reference and guidance to this important and developing area of commercial law and practice This book provides a comprehensive guidance on the law governing contracts used by operators concerned in the movement of goods focusing particularly on where more than one mode of transport is involved **Fostering Competitive Multimodal Transport Services** United Nations Conference on Trade and Development. Trade and Development Board, 1995 **Freight Forwarding and Multimodal Transport Contracts** David Glass, 2013-07-18 Freight Forwarding and Multimodal Transport Contracts 2nd Edition is a comprehensive guide to the law in relation to contract forms and terms created by operators trade associations or international bodies such as the UN and used as a basis for trading conditions by freight forwarders logistics suppliers combined or multimodal transport operators and container operators This second edition examines the latest editions of contract forms and terms both where their object is the supply or procurement of multimodal carriage as well as where they are directed to the use of combined transport equipment ie containers swap bodies Of particular prominence will be a detailed examination of the latest versions of conditions used by the principal UK forwarding logistics intermodal and container operators such as the British International Freight Association BIFA conditions 2005A and the current Freightliner Conditions as well as updates on many of the conditions in use and legal developments relevant to them eg Road Haulage Association Conditions 2009 Maersk Conditions of Carriage TT Club Conditions **Freight Forwarder's Intermediary Role in Multimodal Transport Chains** Hans-Joachim Schramm, 2012-01-05 In this book the business of international freight forwarding is examined from both a theoretical and empirical point of view with a special emphasis on multimodal transport chains including sea or air transport operations In such contexts the freight forwarder is always considered The

Architect of Transport but this intermediary role seems to be largely neglected in research to date Therefore relevant concepts from economic theory and economic sociology are employed to produce both an intermediary and a network perspective of freight forwarding in order to provide a better understanding of this kind of transportation business Furthermore its intermediary role in such inherent network structures is explored by mapping relationship patterns in a stylized model framework applied to a questionnaire based sample collected among freight forwarders engaged in such multimodal transport chains in Germany especially from Hamburg Bremen and Bremerhaven as well as in Austria in 2003
