On being different: Exploring the relationship between dissimilarity and social inclusion in the workplace Onur Sahin,2024-09-06 In this dissertation I investigate how being different from the majority of one s colleagues shapes social inclusion perceptions at work In Chapter 1 I introduce the relational demography approach and ingroup projection model as the frameworks of my dissertation and summarize the methods findings and broader implications of the empirical chapters that follow In these chapters I utilize a multi method approach consisting of desk research experimental studies and large scale correlational studies to offer six significant contributions to the literature First in Chapter 2 an analysis of diversity statements of 84 Dutch private and public organizations showed that most statements include both surface level readily visible such as gender and ethnicity and deep level dimensions more underlying such as personality and sexual orientation However surface level dimensions were more often included without clear differences between statements of private and public organizations Second in Chapter 3 experimental studies N 128 in Study 1 N 196 in

Study 2 recruited via Prolific established the causal relationship between dissimilarity and social inclusion Third in Chapter 4 a survey study with 887 employees of a public organization in the Netherlands revealed that deep level dissimilarity rather than surface level dissimilarity related to social inclusion and that inclusion explained the relationships between dissimilarity and work related outcomes Fourth in Chapter 5 a survey study with 6 312 employees of another Dutch public organization accounted for multidimensionality and revealed that as employees perceived dissimilarity on more dimensions they perceived less inclusion Furthermore the results showed that dissimilarity in personality ethnicity cultural background age level of education work experience and disability negatively related to perceptions of inclusion offering a more nuanced understanding of the dissimilarity inclusion relationship Fifth a review of the relational demography literature in Chapter 6 identified four general mechanisms theorized to explain why dissimilarity relates to outcomes 1 uncertainty 2 trust 3 disapproval and 4 initiated interaction between colleagues A survey study with 2 409 UK residents recruited via Prolific confirmed that all four mechanisms uniquely explained the dissimilarity inclusion relationship Sixth and finally I found support for the indispensable role of the organizational climate for inclusion across Chapters 4 5 and 6 In these chapters a positive climate for inclusion buffered the negative relationships between dissimilarity and outcomes My research argues for a broader consideration of dissimilarity dimensions beyond the dimensions diversity policies typically focus on emphasizing the importance of recognizing multidimensionality and the crucial contextual role of climate for inclusion This dissertation not only enriches our understanding of workplace diversity but also offers actionable opportunities to mitigate social inclusion disparities

Rethinking Organizational Diversity, Equity, and Inclusion
William J. Rothwell, Phillip L. Ealy, Jamie Campbell, 2022-05-03

Research has shown that having a diverse organization only improves and enhances businesses Forbes and Time report that diversity is an 8 Billion a year investment However poorly implementing diversity programs have damaging effects on the organization and the very individuals these programs attempt to help Poorly implemented programs can cause peers and subordinates to question decisions and lose faith in leadership In addition it can cause even the most confident individuals to doubt their own skillset and qualifications Many organizations have turned to training to solve this complex issue Yet still other organizations have created and filled diversity and inclusion positions to tackle the issue The effects of these poorly implemented programs are highlighted during strenuous times such as the latest COVID 19 pandemic Marginalized people are more marginalized and resources and support do not reach everyone Tasks such as providing technical support conducting large group meetings or distributing work obligations without seeing employees on a daily basis becomes more challenging Complex problems cannot be solved with simple solutions Using organization development OD to develop a comprehensive change initiative can help This book outlines how properly conducting an OD change initiative can effectively increase an organization s diversity and inclusion it is grounded in research based literature on diversity and OD principles Many organizational leaders realize the key importance of diversity equity inclusion and multiculturalism in modern organizations It is only through such efforts can organizations thrive in a networked world where much work is done virtually and often across borders But a common scenario is that leaders recognizing the need for a diversity program will pick someone from the organization to launch it Perhaps the person identified for this challenge is in the HR department but has had no experience in launching diversity efforts or even in managing large scale long term organization wide change efforts But these are the challenges to be faced This book quickly identifies some reasons why diversity programs fail and how to avoid those failures The majority of the book highlights how

to use OD to improve organization culture and processes to not only increase diversity and inclusion but develop overall organization talent and prevent personal preferences and biases from hindering the selection of the best talent for positions
