

Defining and Assigning Project Codes

You can use project codes to group projects and consolidate large amounts of information, and to generally distinguish one project from another. You can group by project code in the Open Project dialog box and in the Projects window, by right-clicking anywhere in the dialog box or window, choosing **Group and Sort By**, then selecting the project code name. All projects assigned a value for that code display in the Open Project dialog box or the Projects window, grouped by their corresponding value. Any project not assigned a value for the project code is placed at the bottom of the window under a **No Code** group band.

Project codes are set up in the Project Codes dictionary, which is available to the entire enterprise. You can create values for the predefined codes, or you can create new project codes and values for use with your projects. Assign code values to projects using the Codes tab in Project Details.
