Global Corruption and Ethics Management Carole L. Jurkiewicz, 2019-10-25 This book advances the study and practice of ethics management through seminal analyses of the who, how, why, when, and where of corruption. In accessible and direct language, thirty foremost scholars and experts from across the globe translate robust theory into actionable programs and policies. Global Corruption and Ethics Management: Translating Theory into Action is focused on integrating research from a diverse array of scholars and translating it into proactive skills. The empirical content is presented in clusters of short chapters; each cluster or section is followed by a synopsis of skills for implementation based upon this new knowledge. The scope of the content encompasses the work of top scholars and experienced professionals from across the globe to strategically outline the mercurial nature of corruption, its causes, the systems and practices that facilitate it, its short and long term consequences, new measures for assessing and diagnosing remedies, and steps that can be taken to prevent it. Scholars and students can use it as a jumping off point for further research, and practitioners can immediately expand their repertoire of tools in preventing and fighting corruption through implementation of the skills synopses. Further incorporating accessible instructor tools will dramatically shift the benchmark for studying and implementing Global Corruption and Ethics Management; there is no other book on corruption AND ethics management with the empirical gravitas, variety of application tools, and with this level of accessibility.
