Books in Print Supplement ,1994    *Forthcoming Books* Rose Arny,2003    **Scientific and Technical Books and Serials in Print** ,1989    **The British National Bibliography** Arthur James Wells,2000    Subject Guide to Books in Print ,1993    Books in Print ,1991    Challenges and Controversies in Management Research Bill Lee,Catherine Cassell,2011-01-25 Management research has expanded considerably over recent decades The impetus for such growth comes from a wide range of forces both inside and outside of the academic community stimulate and regulate its development while the audience for which management research might be considered to be useful and the extent of that usefulness are highly contested This book seeks to explore the forces that drive the development of management research shape its current state and influence its future potential    **Financial Market Bubbles and Crashes, Second Edition** Harold L. Vogel,2018-08-16 Economists broadly define financial asset price bubbles as episodes in which prices rise with notable rapidity and depart from historically established asset valuation multiples and relationships Financial economists have for decades attempted to study and interpret bubbles through the prisms of rational expectations efficient markets and equilibrium arbitrage and capital asset pricing models but they have not made much if any progress toward a consistent and reliable theory that explains how and why bubbles and crashes evolve and can also be defined measured and compared This book develops a new and different approach that is based on the central notion that bubbles and crashes reflect urgent short side rationing which means that as such extreme conditions unfold considerations of quantities owned or not owned begin to displace considerations of price    **American Book Publishing Record** ,1990    **The Publishers' Trade List Annual** ,1985    **Edumetrics** Nadir Altinok,Claude Diebolt,2026-01-01 This book introduces edumetrics a rigorous interdisciplinary framework for measuring learning outcomes over time and across space Based on Lord Kelvin s maxim that to measure is to know edumetrics redefines education as an empirical science that integrates economics psychology and social science to quantify cognitive and non cognitive competencies By harmonizing data from over 120 countries spanning half a century the book transforms fragmented indicators into coherent measures of learning quality and equity It critiques the limitations of traditional human capital theory and challenges the use of years of schooling as a proxy for skill Through econometric analysis historical inquiry and global datasets including Learning Adjusted Years of Schooling it reveals that educational structures not just resources shape productivity adaptability and social cohesion At its core the book addresses the paradox of why rising investments in schooling have not yielded proportional gains in learning With its integration of theory data and historical perspective it serves as both a methodological blueprint and a call to rethink how we define measure and value learning in the twenty first century    **Advances in Financial Planning and Forecasting (New Series) Vol 6** Cheng F. quantitative and accounting analyses of issues in financial analysis and planning in terms of finance accounting and economic data The Economics of Gender Equality in the Labour Market Meltem İnce Yenilmez, Gül Ş. Huyugüzel Kışla, 2021-03-07

This book evaluates the global labour market in the context of gender equality and the associated policies and regulations particularly in developing markets to recommend measures for encouraging gender equality. It exposes the barriers that women employees encounter as well as some of the societal and workplace policies they specifically are subject to. Important themes within this topic include participation rates, the looming gap in hourly pay availability of part-time and full-time positions, value and social status associated with jobs held by men and women. The book examines how global gender policy objectives such as gender equality in careers, gender balance in decision making and gender dimensions in research can be incorporated into policy frameworks. The book analyzes the gendered nature of assumptions, processes and theories. The juxtaposition between family and work, tradition and modernity and dependency and autonomy clearly still seems to be misunderstood. Therefore, the book asks whether work improves women's positions in society and/or changes their roles in their families. The authors explore and uncover the connections among employment, entrepreneurship, migration, economies and gender, global labour markets and provide helpful solutions to the perceptions surrounding women's status, risks and inequality that limit their economic participation. This insightful read provides comprehensive details on a variety of themes and encourages further research on policies that are key to promoting gender equality. The book will appeal to postgraduate students and researchers of labour and feminist economics, the economics of gender, women's studies and sociology.
