*Solutions for Capital Budgeting Problems* Minoo Dhunjisha Daver,1965      *Problems in Capital Budgeting and the 'Discounted Payback Plus' Solution* James S. Sagner,2007 Capital budgeting techniques that use discounted cash flow analysis are widely recommended in the financial literature and frequently used by business However there is accumulating evidence that companies are reluctant to commit funds to long term projects The most likely explanation is that actual experience has resulted in disappointing returns often below a company s cost of capital No capital budgeting technique currently in use applies probabilities to future inflow estimates to adjust the financial analysis to previous experience with the requesting business unit The discounted payback plus technique recommended in this paper may be a reasonable alternative approach to the analysis of a capital budgeting project yielding more conservative results based on the expected value of cash inflows beyond the point of payback      **Mathematical Programming and the Analysis of Capital**
