BUSINESS RESEARCH Dr. Mukul A. Burghate I Dr. Nilesh A. Chole, Business research is a process of acquiring detailed information of

all the areas of business and using such information in maximizing the sales and profit of the business Such a study helps companies determine which product service is most profitable or in demand In simple words it can be stated as acquisition of information or knowledge for professional or commercial purpose to determine opportunities and goals for a business The purpose of this textbook is to present an introduction to the Business Research subject of MBA The book contains the syllabus from basics of the subjects going into the intricacies of the subjects All the concepts have been explained with relevant examples and diagrams to make it interesting for the readers An attempt is made here by the authors of to assist the students by way of providing Study Material as per the curriculum with non commercial considerations However it is implicit that these are exam oriented Study Material and students are advised to attend regular lectures in the Institute and utilize reference books available in the library for In depth knowledge We owe to many websites and their free contents we would like to specially acknowledge contents of website www.wikipedia.com and various authors whose writings formed the basis for this book We acknowledge our thanks to them At the end we would like to say that there is always a room for improvement in whatever we do We would appreciate any suggestions regarding this study material from the readers so that the contents can be made more interesting and meaningful Readers can email their queries and doubts to our authors on tmcnagpur@gmail.com We shall be glad to help you immediately Authors Dr Mukul A Burghate and Dr Nilesh A Chole

RESEARCH METHODOLOGY THEORY & TECHNIQUES Shrikant Patel,S. R. Jena,Abhijit Gupta,Dr. Pankaj Lathar,2023-05-03 The goal of conducting research that is descriptive is to offer a description of the subject under investigation For a product that has just been released for example the characteristics of consumers may be stated in terms of the degree to which product usage varies with factors such as income age gender and other characteristics In another example the characteristics of consumers may be stated in terms of the degree to which product usage changes over time In order to generate the most possible revenue a descriptive study needs to collect data for a certain purpose A single hypothesis should be used as the guiding principle whenever descriptive investigations produce varying degrees of agreement It makes it possible to test both implicit and explicit hypotheses however the specifics of how this is done depend on the area of study that is being conducted For instance a corporation that deals in petroleum would find that its sales had decreased The company is able to draw this conclusion based on the feedback it receives from the market which indicates that economically challenged households do not purchase the company s oil for use in the kitchen After then one may perhaps do descriptive research in order to put such a theory to the test The phase of research described as the act of modifying one or more variables under the conditions in which the data that indicates the effects will be collected is referred to as experimentation The term experimentation refers to this phase of research Experiments will create artificial situations in order to supply the researcher with the precise data required for the study as well as the methods to properly measure that data This will be accomplished by fabricating fictitious conditions Experiments are considered to be artificial due to the

fact that the conditions in which they are conducted are frequently constructed for the sole purpose of carrying out the experiment. Because doing so grants the researchers a greater degree of control over the factors that are the subject of their investigation, the experimental places a heavy emphasis on the use of artificial components. They will be in a position to gather more convincing evidence of the cause and effect linkages that exist between the variables if they are able to exercise control over those factors that are components of a particular scenario. Therefore, the ability to create a scenario with the express purpose of observing and accurately recording the effect that a deliberate change in another factor has on a first factor enables researchers to accept or reject hypotheses with an absolute certainty that is beyond the realm of reasonable doubt.

Business Research Methods Pamela S. Schindler, 2018-04 Earlier editions were co-authored with Donald R. Cooper
Research Methodology: Concepts and Cases Deepak Chawla & Neena Sodhi, 2011 RESEARCH METHODOLOGY CONCEPT AND CASES provides a comprehensive and stepwise understanding of the research process with a balanced blend of theory, techniques, and Indian illustrations from a wide cross-section of business areas. This book makes no presumptions and can be used with confidence and conviction by both students and experienced managers who need to make business sense of the data and information that is culled out through research groups. The conceptual base has been provided in comprehensive yet simplistic detail, addressing even the minutest explanations required by the reader. The language maintains a careful balance between technical know-how and business jargon. Every chapter is profusely illustrated with business problems related to all domains: marketing, finance, human resource, and operations. Thus, no matter what the interest area may be, the universal and adaptable nature of the research process is concisely demonstrated.

Proceedings of the 7th Global Conference on Business, Management, and Entrepreneurship (GCBME 2022) Ratih Hurriyati, Lili Adi Wibowo, Ade Gafar Abdullah, Sulastri, Lisnawati, Yusuf Murtadlo, 2023-09-29 This is an open access book.
