Colon Cancer Diagnosis and Therapy Ganji Purnachandra Nagaraju, Dhananjay Shukla, Naveen Kumar Vishvakarma, 2021
Colorectal cancer CRC is a major global health challenge as the third leading cause for cancer related mortalities worldwide. Despite advances in therapeutic strategies the five year survival rate for CRC patients has remained the same over time due to the fact that patients are often diagnosed in advanced metastatic stages. Drug resistance is another common reason for poor prognosis. Researchers are now developing advanced therapeutic strategies such as immunotherapy, targeted therapy and combination nanotechnology for drug delivery. In addition the identification of new biomarkers will potentiate early stage diagnosis. This book is the first of three volumes on recent developments in colorectal diagnosis and therapy. Each volume can be read on its own or together. Each volume focuses on different novel therapeutic advances, biomarkers and identifies therapeutic targets for treatment. Written by leading international experts in the field, coverage also addresses the role of diet habits and lifestyle in reducing gastrointestinal disorders and incidence of CRC. Chapters discuss current and future diagnostic and therapeutic options for colorectal cancer patients focusing on immunotherapeutic nanomedicine, biomarkers and dietary factors for the effective management of colon cancer. **Colon Cancer Diagnosis and Therapy Vol. 3**
