parts the first examines place travel history and language in 20th century texts while the second explores tensions and transformations in the depiction of Otherness mainly in texts published in the early 21st century This book reveals that even at the end of the 20th century these texts display neocolonialist attitudes towards the Other While more recent texts show noticeable changes in attitudes these changes can often fall short as stereotypes and prejudices are often still present just below the surface in popular novels The understudied field of popular romance in which the Other is frequently present as a love interest proves to be a fruitful area in which to explore the potential and the realities of the treatment of Otherness in popular culture Scholars of literature communication romance and rhetoric will find this book particularly useful
