Genetic Algorithms in Engineering and Computer Science G. Winter, 1995 Genetic Algorithms in Engineering and Computer Science Edited by G Winter University of Las Palmas Canary Islands Spain J P riaux Dassault Aviation Saint Cloud France M Gal n P Cuesta University of Las Palmas Canary Islands Spain This attractive book alerts us to the existence of evolution based software Genetic Algorithms and Evolution Strategies used for the study of complex systems and difficult optimization problems unresolved until now Evolution algorithms are artificial intelligence techniques which mimic nature according to the survival of the fittest Darwin s principle They randomly encode physical quantitative or qualitative variables via digital DNA inside computers and are known for their robustness to better explore large search spaces and find near global optima than traditional optimization methods The objectives of this volume are two fold to present a compendium of state of the art lectures delivered by recognized experts in the field on theoretical numerical and applied aspects of Genetic Algorithms for the computational treatment of continuous discrete and combinatorial optimization problems to provide a bridge between Artificial Intelligence and Scientific Computing in order to increase the performance of evolution programs for solving real life problems Fluid dynamics structure mechanics electromagnetics automation control resource optimization image processing and economics are the featured multi disciplinary areas among others in Engineering and Applied Sciences where evolution works impressively well This volume is aimed at graduate students applied mathematicians computer scientists researchers and engineers who face challenging design optimization problems in Industry They will enjoy implementing new programs using these evolution techniques which have been experimented with by Nature for 3 5 billion years Advances in Parallel, Distributed Computing Dhinaharan Nagamalai, Eric Renault, Murugan Dhanuskodi, 2011-09-14 This book constitutes the refereed proceedings of the First International Conference on Advances in Parallel Distributed Computing Technologies and Applications PDCTA 2011 held in Tirunelveli India in September 2011 The 64 revised full papers were carefully reviewed and selected from over 400 submissions Providing an excellent international forum for sharing knowledge and results in theory methodology and applications of parallel distributed computing the papers address all current issues in this field with special focus on algorithms and applications computer networks cyber trust and security wireless networks as well as mobile computing and bioinformatics *AI-Powered IoT in the Energy Industry* S. Vijayalakshmi, Savita ., Balamurugan Balusamy, Rajesh Kumar Dhanaraj, 2023-04-05 AI Powered IoT in the Energy Industry Digital Technology and Sustainable Energy Systems looks at opportunities to employ cutting edge applications of artificial intelligence AI the Internet of Things IoT and Machine Learning ML in designing and modeling energy and renewable energy systems The book s main objectives are to demonstrate how big data can help with energy efficiency and demand reduction increase the usage of renewable energy sources and assist in transitioning from a centralized system to a distributed efficient and embedded energy system Contributions cover the fundamentals of the renewable energy sector including solar wind

biomass and hydrogen as well as building services and power generation systems Chapters also examine renewable energy property prediction methods and discuss AI and IoT prediction models for biomass thermal properties Covers renewable energy sector fundamentals Explains the application of big data in distributed energy domains Discusses AI and IoT prediction methods and models Hotline ,1991 Artificial Intelligence in Education Matthew N.O. Sadiku,Sarhan M. Musa,Uwakwe C. Chukwu,2022-01-27 The quest for building an artificial brain developed in the fields of computer science and psychology Artificial intelligence AI sometimes called machine intelligence refers to intelligence demonstrated by machines while the natural intelligence is the intelligence displayed by humans and animals Typically AI systems demonstrate at least some of the following human behaviors planning learning reasoning problem solving knowledge representation perception speech recognition decision making language translation motion manipulation intelligence and creativity Artificial intelligence is an emerging technology which the educational sector can benefit from In this book we consider the applications of AI in key areas of education Artificial intelligence in education AIED refers to the application of AI technologies in educational settings to facilitate teaching learning or decision making AI will impact the education field in the areas of administration instruction and personalized and individualized learning applications In this book AI is specifically applied in the following key educational sectors education natural sciences social sciences computer science engineering business and medicine

Emerging Technologies in Africa Matthew N. O. Sadiku,2025-10-21 Africa is a booming continent with incredible growth potential and is the second largest continent in the world The continent is home to immense potential and abundant resources It is also the home to some of the youngest populations in the world The continent is not just catching up with the world it is propelling itself to the forefront of innovation Africa is closely watched as the next big growth market Technologies impact every aspect of our modern society African economies have been held back from their full potential but the emerging technologies could help change that The technologies have been gaining a lot of attention from businesses investors educators and governments across Africa They are having an influence on African lives well being and resilience They have come to be perceived as a groundbreaking method that can bypass the several systemic flaws affecting the continent This book explores the use of emerging technologies in Africa These technologies include artificial intelligence robotics 3D printing cloud computing nanotechnology Internet of things blockchain and drones The book is organized into ten chapters that summarize these technologies and their adoption in African nations It is a must read for those interested in the socio economic development of Africa
