Paper And Paperboard Packaging Technology:

Handbook of Paper and Paperboard Packaging Technology Mark J. Kirwan,2012-11-07 The definitive industry reference on the paper and paperboard packaging sector Now in a fully revised and updated second edition this book discusses all the main types of packaging based on paper and paperboard It considers the raw materials the manufacture of paper and paperboard and the basic properties and features on which packaging made from these materials depends for its appearance and performance The manufacture of twelve types of paper and paperboard based packaging is described together with their end use applications and the packaging machinery involved The importance of pack design is stressed as well as how these materials offer packaging designers opportunities for imaginative and innovative design solutions Environmental factors including resource sustainability societal and waste management issues are addressed in a dedicated chapter The book is directed at readers based in companies which manufacture packaging grades of paper and paperboard companies involved in the design printing and production of packaging and companies which manufacture inks coatings adhesives and packaging machinery It will be essential reading for students of packaging technology and technologists working in food manufacturing who are users of paper and paperboard packaging products Praise for the First Edition This book is a valuable addition to the library of any forward looking company by providing in depth coverage of all aspects of packaging which involve the most ecologically acceptable material namely paper and paperboard International Journal of Dairy Technology a welcome contribution to a field where coverage was previously limited to subject specific books or to single chapters in textbooks on broader aspects of packaging technology Packaging Technology and Science Paper and Paperboard Packaging Technology Mark J. Kirwan,2008-04-15 This book discusses all the main types of packaging based on paper and paperboard It considers the raw materials and manufacture of paper and paperboard and the basic properties and features on which packaging made from these materials depends for its appearance and performance The manufacture of twelve types of paper and paperboard based packaging is described together with their end use applications and the packaging machinery involved The importance of pack design is stressed and how these materials offer packaging designers opportunities for imaginative and innovative design solutions Environmental and waste management issues are addressed in a separate chapter The book is directed at those joining companies which manufacture packaging grades of paper and paperboard companies involved in the design printing and production of packaging and companies which manufacture inks coatings adhesives and packaging machinery It will be essential reading for students of packaging technology Cartons, Crates and Corrugated Board, Second Edition Diana Twede,Susan E. M. Selke,Donatien-Pascal Kamdem,David Shires,2014-12-22 New expanded second edition with key technical regulatory and marketing developments from the past 10 years in the packaging industryCovers the materials processes and design of virtually all paper and fiberboard packaging for end products displays storage and distributionNew information on European and global standards selection criteria for

paperboard as well as emerging sustainability initiatives Explains recent tests measurements and costs with ready to use calculations Ten years ago the first edition of *Cartons Crates and Corrugated Board* quickly became the standard reference book for wood and paper based packaging Endorsed by TAPPI and other professional societies and used as a textbook worldwide the book has now been extensively revised and updated by a team formed by the original authors and two additional authors While preserving the critical performance and design data of the previous edition this second expanded edition offers new information on the technologies tests and regulations impacting the paper and corrugated industries worldwide with a special focus on Europe and Japan New information has been added on tests and novel designs for folded cartons as well as expanded discussions of paperboard selection for specific applications emerging barrier packaging food contact and migration and the dynamics and opportunities of corrugated in distribution systems Recent developments on recycling and sustainability are also highlighted

Food Packaging Gordon L. Robertson, 2016-04-19 This book presents an integrated approach to understanding the principles underlying food packaging and their applications This edition includes new and expanded coverage of biobased packaging and bionanocomposites nanotechnology applications including nanoclays metallization and atomic layer deposition shelf life design analysis and estimation safety and legislative aspects of packaging including public interest in food contact materials such as BPA and phthalates life cycle assessment and sustainability A new chapter addresses food packaging closures and sealing systems including closures for plastic and composite containers and peelable seals

Biopolymer Grafting: Synthesis and Properties Vijay Kumar Thakur, 2017-09-27 *Biopolymer Grafting Synthesis and Properties* presents the latest research and developments in fundamental of synthesis and properties of biopolymer based graft copolymers The book presents a broad overview of the biopolymer grafting process along with trends in the field It also introduces a range of grafting methods which lead to materials with enhanced properties for a range of practical applications along with the positives and limitations of these techniques The book bridges the knowledge gap between the scientific principles and industrial applications of polymer grafting This book covers synthesis and characterization of graft copolymers of plant polysaccharides functional separation membranes from grafted biopolymers and polysaccharides in alternative methods for insulin delivery Recent trends and advances in this area are discussed assisting materials scientists and researchers in mapping out the future of these new green materials through value addition to enhance their use Introduces polymer researchers to a promising rapidly developing method for modifying naturally derived biopolymers Provides a one stop shop covering synthesis properties characterization and graft copolymerization of bio based polymeric materials Increases familiarity with a range of biopolymer grafting processes enabling materials scientists and engineers to improve material properties and widen the range of potential biopolymer applications
