*Principles and Practice of Automatic Process Control* Richard G. Smith, 1986-01-03 [Instrument Engineers' Handbook, Volume Two](#) Bela G. Liptak, 2018-10-08 The latest update to Bela Liptak's acclaimed bible of instrument engineering is now available. Retaining the format that made the previous editions bestsellers in their own right, the fourth edition of *Process Control and Optimization* continues the tradition of providing quick and easy access to highly practical information. The authors are practicing engineers, not theoretical people from academia, and their advice has been repeatedly tested in real-life applications. Expanded coverage includes descriptions of overseas manufacturer's products and concepts, model-based optimization in control theory, new major inventions and innovations in control valves, and a full chapter devoted to safety. With more than 2000 graphs, figures, and tables, this all-inclusive encyclopedic volume replaces an entire library with one authoritative reference. The fourth edition brings the content of the previous editions completely up to date, incorporates the developments of the last decade, and broadens the horizons of the work from an American to a global perspective. Bela G. Liptak speaks on Post Oil Energy Technology on the AT&T Tech Channel.

**Principles and Practices of Automatic Process Control** Carlos A. Smith, Armando B. Corripio, 2005-08-05 Highly practical and applied, this Third Edition of Smith and Corripio's *Principles and Practice of Automatic Process Control* continues to present all the necessary theory for the successful practice of automatic process control. The authors discuss both introductory and advanced control strategies and show how to apply those strategies in industrial examples drawn from their own professional practice. The strengths of the book are its simplicity, excellent examples, practical approach, real case studies, and focus on Chemical Engineering processes. More than any other textbook in the field, Smith and Corripio prepares a student for use of process control in a manufacturing setting. Course Hierarchy: Course is called *Process Control*, Senior level course. Same course as Seborg, but Smith is considered more accessible.
