1. **Cross-compiler is a compiler**
 - (a) which is written in a language that is different from the source language.
 - (b) that generates object code for its host machine.
 - (c) which is written in a language that is same as the source language.
 - (d) that runs on one machine but produces object code for another machine.
2. **Incremental-compiler is a compiler**
 - (a) which is written in a language that is different from the source language
 - (b) that generates object code for its host machine
 - (c) which is written in a language that is same as the source language
 - (d) that allows a modified portion of a program to be recompiled
3. **For which of the following reasons, an interpreter is preferred to a compiler?**
 - (a) It takes less time to execute.
 - (b) It is much helpful in the initial stages of program development.
 - (c) Debugging can be faster and easier.
