Value-Added Biocomposites Malinee Sriariyanun, Sanjay Mavinkere Rangappa, Suchart Siengchin, Hom Nath Dhakal, 2021-09-06 Value Added Biocomposites Technology Innovation and Opportunity explores advances in research processing manufacturing and novel applications of biocomposites It describes the current market situation commercial competition and societal and economic impacts and advantages of substituting biocomposites for conventional composites including natural fibers and bioplastics

FEATURES Discusses manufacturing and processing procedures that focus on improving physical mechanical thermal electrical chemical and biological properties and achieving required specifications of downstream industries and customers Analyzes the wide range of available base materials and fillers of biocomposites and bioplastics in terms of the strength and weaknesses of materials and economic potential in the market Displays special and unique properties of biocomposites in different market sectors Showcases the insight of expert scientists and engineers with first hand experience working with biocomposites across various industries Covers environmental factors life cycle assessment and waste recovery Combining technical economic and environmental topics this work provides researchers advanced students and industry professionals a holistic overview of the value that biocomposites add across a variety of engineering applications and how to balance research and development with practical results

Current Advancements in Nanomaterials for Wastewater Remediation Igor Krupa, Deepalekshmi Ponnamma, Sneha Mohan Bhagyaraj, 2025-11-01 Current Advancements in Nanomaterials for Wastewater Remediation Challenges and Mitigation Strategies provides a comprehensive overview of recent developments in wastewater treatment supported mainly by nanotechnology assisted techniques It brings together the latest advances in nanomaterials and technologies and their diverse applications for wastewater remediation The book begins by discussing water quality standards monitoring strategies and different sources of water pollution including various organic and inorganic contaminants like oil spills dyes metal pollutants food waste and pharmaceutical wastes Subsequent chapters provide the latest developments on the science engineering and application of advanced nanomaterials for a wide range of technologies used for wastewater treatment and produced water treatment such as physical chemical nanomaterial assisted and membrane supported methods and techniques Scientists and researchers in academia and industry will benefit from this comprehensive resource on the nanomaterials behind the technologies at which wastewater sources can be purified from contaminants Presents the latest advances in nanomaterials and technologies in the field of water treatment Provides detailed information on the application of advanced nanomaterials for a wide range of technologies used for removal of contaminants from wastewater Addresses challenges and uses case studies to support further development and implementation

**Biological Wastewater Treatment: Principles, Modeling and Design** Guang-Hao Chen, Mark C.M. van Loosdrecht, G.A. Ekama, Damir

Brdjanovic,2020-07-15 The first edition of this book was published in 2008 and it went on to become IWA Publishing's bestseller. Clearly there was a need for it because over the twenty years prior to 2008 the knowledge and understanding of wastewater treatment had advanced extensively and moved away from empirically based approaches to a fundamental first principles approach based on chemistry, microbiology, physical and bioprocess engineering, mathematics and modelling. However, the quantity, complexity and diversity of these new developments was overwhelming for young water professionals, particularly in developing countries without readily available access to advanced level tertiary education courses in wastewater treatment. For a whole new generation of young scientists and engineers entering the wastewater treatment profession, this book assembled and integrated the postgraduate course material of a dozen or so professors from research groups around the world who have made significant contributions to the advances in wastewater treatment. This material had matured to the degree that it had been codified into mathematical models for simulation with computers. The first edition of the book offered that upon completion of an in-depth study of its contents, the modern approach of modelling and simulation in wastewater treatment plant design and operation could be embraced with deeper insight, advanced knowledge and greater confidence, be it activated sludge, biological nitrogen and phosphorus removal, secondary settling tanks or biofilm systems. However, the advances and developments in wastewater treatment have accelerated over the past 12 years since publication of the first edition. While all the chapters of the first edition have been updated to accommodate these advances and developments, some such as granular sludge, membrane bioreactors, sulphur conversion based bioprocesses and biofilm reactors, which were new in 2008, have matured into new industry approaches and are also now included in this second edition. The target readership of this second edition remains the young water professionals who will still be active in the field of protecting our precious water resources long after the aging professors who are leading some of these advances have retired. The authors, all still active in the field, are aware that cleaning dirty water has become more complex but that it is even more urgent now than 12 years ago and offer this second edition to help the young water professionals engage with the scientific and bioprocess engineering principles of wastewater treatment science and technology with deeper insight, advanced knowledge and greater confidence built on stronger competence.

Beneficial Elements for Remediation of Heavy Metals in Polluted Soil Shah Saud, Shah Fahad, Depeng Wang, 2025-02-21 Beneficial Elements for Remediation of Heavy Metals in Polluted Soils provides readers with comprehensive information on soil pollution and beneficial elements. Each chapter summarizes the beneficial elements interaction in soil and its impact on the environment. In addition, the book covers many current environmental issues such as pollution and monitoring of various heavy metals, organic pollutants and environmental hormones such as pesticides. The book goes a step further by offering information on substances that have been recently confirmed and suspected to be carcinogenic, chromogenic and transtoxic. Toxicological issues such as the type and condition of the pollutants, toxicity, mechanism of action and influencing factors, metabolic processes in vivo and toxic

damage manifestations are also addressed Explains the impact of soil pollution on agriculture sector Enables soil scientists to design policies and management strategies for sustainable agriculture under changing climate Represent the most current scientific information regarding soil productivity under changing climate Soils and Environmental Quality Gary M. Pierzynski, George F. Vance, J. Thomas Sims, 2005-05-02 A perpetual bestseller this third edition explores environmental quality from the perspective of soil science The coverage ranges from the theoretical to the practical with an abundance of examples such as an exploration of allowable pesticide concentrations in drinking water and an inquiry into soil contamination from the trace elements in organic by products It also explores the use of soil carbon sequestration as a remedy for global climate change and the effects of acid precipitation on forestation Case studies with political economic and legal implications illustrate the human side of environmental problems Also covered is the use or misuse of the Scientific Method and the potential for factual bias The three authors all teaching professors distinguished in soil science have updated this student favorite to include a greater number of even more relevant topics Responding to request Geotitles, 1992
